(1) Summary of operations and significant accounting policies

(a) Operations

Banco de Costa Rica (the Bank) is an autonomous, independently managed, public law institution organized in 1877. As a State-owned public bank, it is regulated by the Internal Regulations of the National Banking System (IRNBS), the Internal Regulations of the Central Bank of Costa Rica, and by the Political Constitution of the Republic of Costa Rica. It is also subject to oversight by the General Superintendence of Financial Entities (SUGEF) and the Comptroller General of the Republic (CGR). The Bank's registered office is located at Avenida Central and Avenida Segunda, Calle 4 and Calle 6, in San José, Costa Rica.

The Banks website is www.bancobcr.com.

The Bank is mainly dedicated to extending loans and granting bid and performance bonds; issuing certificates of deposit; opening checking accounts in colones, U.S. dollars, and euros; issuing letters of credit; providing collection services; buying and selling foreign currency; managing trusts; providing custodial services for assets; and other banking operations. As of June 30, 2020, the Bank has 186 distributed among the national territory, has in operation 652 automated teller machines, and has 3,704 employees

The financial statements and notes thereto are expressed in colones (¢), the monetary unit of the Republic of Costa Rica.

The Bank is shareholder owner of a 100% of the following subsidiaries:

BCR Valores, S.A. (brokerage firm) was organized as a corporation in February 1999 under the laws of the Republic of Costa Rica. Its main activity is securities trading.

BCR Sociedad Administradora de Fondos de Inversion, S.A. (investment fund manager company) was organized as a corporation in July 1999 under the laws of the Republic of Costa Rica. Its main activity is investment fund management.

BCR Pensión Operadora de Planes de Pensiones Complementarias, S.A. (pension fund operator) was organized as a corporation in September 1999 under the laws of the Republic of Costa Rica. Its main activity is managing supplemental pension plans and offering additional services related to disability and death plans to members.

BCR Corredora de Seguros, S.A. (insurance broker) was organized as a corporation in February 2009 under the laws of the Republic of Costa Rica. Its main activity is insurance underwriting.

Banprocesa - TI. S.R.L. was organized as a corporation in August 2009 under the laws of the Republic of Costa Rica. Its main activity will be to provide IT processing services and technical support, purchase, lease, and maintain hardware and software, including software development, and address the Bank's IT needs. As of June 30, 2020, SUGEF is evaluating its participation as part of the conglomerate.

Depósito Agrícola de Cartago, S.A. and subsidiary, was organized as a corporation in October 1934 under the laws of the Republic of Costa Rica. Its main activity is the custody and storage of personal property of national and foreign origin, with its own legal status and administratively independent. The company is regulated by the Ley de Almacenes Generales.

Depósito Agrícola de Cartago, S.A. has a wholly owned subsidiary named Almacen Fiscal Agrícola de Cartago, S.A., constituted in December 1991 under the laws of the Republic of Costa Rica. Its main activity is the custody and storage of merchandise on which no import taxes have been paid, regulated by the General Customs Law and supervised by the General Customs Directorate of the Ministry of Finance. Both companies are subject to the oversight of the Comptroller General of the Republic.

Bancrédito Sociedad Agencia de Seguros, S.A., organized in March 2009 under the laws of the Republic of Costa Rica. As of April 30, 2020 this entity was settled.

The Bank holds a 51% ownership interest in the following subsidiary:

Banco Internacional de Costa Rica, S.A. and subsidiary (BICSA) was organized as a bank under the laws of the Republic of Panama in 1976. It operates under a general license granted by the Superintendence of Banks of Panama to engage in banking transactions in Panama or abroad; its office is located in the city of Panama, Republic of Panama, BICSA Financial Center, 50 floor, Avenida Balboa and Calle Aquilino de la Guardia, and its subsidiary in Miami, Florida, United States of America. The remaining 49% of BICSA's stocks are owned by Banco Nacional de Costa Rica.

(b) Accounting policies for financial statement preparation

The Bank's financial statements are prepared in compliance with the accounting regulations applicable to Supervised Entities, in accordance with the legal provisions, rules, and accounting regulations issued by the National Financial System Supervisory Board (CONASSIF), the General Superintendence of Financial Entities (SUGEF) and the Central Bank of Costa Rica (BCCR), and in those matters that are not covered by those entities, according to the International Financial Reporting Standards as of January 1, 2011 (IFRS).

Through communication C.N.S. 116-07 from December 18, 2007, the National Financial System Supervisory Board issued a reform to the regulations denominated "Accounting Standard Applicable to the Entities Supervised by SUGEF, SUGEVAL and SUPEN and to the non-financial issuers." The objective of such standard is to regulate the adoption and application of the International Financial Reporting Standards (IFRS) and the corresponding interpretations (SIC and IFRIC interpretations.)

Afterwards, through articles 8 and 5 of minutes corresponding to sessions 1034-2013 and 1035-2013, held on April 2, 2013, respectively, the National Financial System Supervisory Board made a change to the "Accounting standard applicable to the entities supervised by SUGEF, SUGEVAL and SUPEN and to the Non-Financial issuers."

According to such document, the IFRS and its interpretations must be mandatorily applied by the supervised entities, in accordance with the texts in force as of January 1, 2011. This is for the audits as of December 31, 2015, except for the special treatments applicable to the supervised entities and non-financial issuers. The anticipated adoption of standards is not allowed.

Issuing new IFRSs or interpretation by the IASB, as well as any amendment to the adopted IFRSs to be applied by the entities under supervision will require a prior authorization by the National Financial System Supervisory Board (CONASSIF).

The financial statements have been prepared based on historical costs as explained in the accounting policies below.

Historical costs are generally based on the fair value of the consideration for goods and services.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants on the measurement date, regardless of whether price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Bank takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability on the measurement date. Fair value for measurement and/or disclosure purposes in these financial statements is determined on such a basis, except for the stock-based payment transactions within the scope of IFRS 2, the lease transactions within the scope of IAS 17, and the measurements that have certain similarities with the fair value but which are not fair value, such as the net realizable value in IAS 2 or the value in use in IAS 36.

In addition, for financial reporting purposes, fair value measurements are categorized into Level 1, 2 or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirely, which are described as follows:

- Level 1 - inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;

- Level 2 - inputs, other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly; and

- Level 3 - unobservable inputs for asset or liability.

(c) Investment in other companies

Valuation of investments by the equity method

i.Subsidiaries

Subsidiaries are entities controlled by the Bank. Control exists when the Bank has the power, directly or indirectly, to govern the financial and operating policies of an entity so as to obtain benefits from its actives. As prescribed by regulations, the financial statements must present investments in subsidiaries by the equity method rather than on a consolidated basis. Transactions that affect the equity of those companies, such as conversion adjustments and unrealized gain or loss on valuation of investments, are recognized in the same manner in the Bank's equity, the effects are recorded in the “Adjustment for valuation of investments in other companies” account.

The Bank and subsidiaries must analyze and evaluate the distribution of dividends in accordance with current internal and external regulations applicable to each entity. The distribution of dividends will be proposed by the Administration of each entity; it will transmit the proposal to the Board of Directors and subsequently send it to the shareholders' meeting in the case of the subsidiaries. Once the amount to be distributed has been determined, the accumulated profits of previous periods and / or the capital stock will be reduced, if necessary.

(d) Foreign currency

i.Foreign currency transactions

Assets and liabilities held in foreign currency are converted to colones at the exchange rate ruling at the separate balance sheet date. Transactions in foreign currency during the year are converted at the foreign exchange rate ruling at the date of the transaction. Conversion gains or losses are presented in the income statement.

ii. Monetary unit and foreign exchange regulations

As of January 30, 2015, the Board of Directors of the Central Bank of Costa Rica, in article 5 of the minutes of session 5677-2015, established a managed floating exchange rate regime starting February 2, 2015, whose main aspects are detailed below:

- In this regime, the Central Bank of Costa Rica will allow the exchange rate to be freely determined by the foreign exchange market, but may participate in the market in a discretionary manner, to meet its own requirements of currency and those of the non-banking Public Sector, in order to avoid sharp exchange fluctuations.

- The Central Bank of Costa Rica may carry out direct operations or use forex held-for-trading instruments it deems appropriate in accordance with the current regulations.

- In its stabilization transactions, the Central Bank of Costa Rica will continue to use in the Foreign Currency Market (MONEX), the rules of engagement with the amendments provided for in this agreement. The Financial Stability Committee must determine the intervention procedures consistent with the strategy approved by the Board.

As established in the Chart of Accounts, assets and liabilities held in foreign currency should be expressed in colones at the exchange rate disclosed by the Central Bank of Costa Rica. Thus, as of June 30, 2020, monetary assets and liabilities denominated in U.S. dollars were valued at the exchange rate of ¢583,49. for US$1.00.

Valuation in colones of monetary assets and liabilities in foreign currency during the period ended June 30, 2020 gave rise to foreign exchange losses of ¢463.634.312.345 and gains for 464.925.050.016, which are presented net in the income statement.

Additionally, valuation of other assets and other liabilities gave rise to gains and losses, respectively, which are recorded in "Other operating income" and "Other operating expenses", respectively. For the period ended June 30, 2020 valuation of other assets gave gains of ¢917.417.607, and valuation of other liabilities gave rise to losses of ¢667.825.598.

iii. Financial statements of foreign subsidiaries (BICSA)

The financial statements of BICSA are presented in U.S. dollars

Those financial statements were converted to Costa Rican colones as follows:

- Assets and liabilities at the closing exchange rate.
- Income and expenses at the average exchange rates in effect during each year.
- Equity at historical exchange rates, using the exchange rate in effect on the dates of the transactions.

Valuation of the participation in the financial statements if this foreign subsidiary gave rise to net profits in the period ended June 30, 2020 for ¢795.605.556.

(e) Basis of financial statements preparations

The financial statements have been prepared on the fair value basis for available-for-sale assets and trading financial instruments. Other financial and non-financial assets and liabilities are recorded at amortized or historical cost. The accounting policies have been consistently applied.

(f) Financial instruments

A financial instrument is any contract that gives rise to both a financial asset of one entity and a financial liability or equity instrument of another entity. The Bank's financial instruments include primary instruments: cash and due from banks, investments in financial instruments, loan portfolio, other receivables, obligations with the public, obligations with entities, and payables.

(i) Classification

Financial instruments at fair value with changes in profit or loss are those maintained by the Bank to generate short-term profits.

Originated instruments are loans and other accounts receivable created by the Bank providing money to a debtor rather than with the intention of short-term profit taking.

Assets at fair value with changes through other comprehensive income are those financial assets that have not been kept at fair value through profit or loss, have not been originated by the Bank and will not be held to maturity.

(ii) Recognition

The Bank recognizes assets at fair value with changes through other comprehensive income at the time it becomes an obligated party, according to the contractual clauses of the instrument. From this date, any gains or losses arising from changes in the fair value of the assets are recognized in equity.

Held-to-maturity assets and originated loans and other accounts receivable are recognized using settlement date accounting, i.e. on the date they are transferred to the Bank.

(iii) Measurement

Financial instruments are measured initially at fair value, including transaction costs.

Subsequent to initial recognition, financial instruments at fair value with changes through other comprehensive income are measured at fair value, except for any instrument that does not have a quoted market price in an active market and whose fair value cannot be reliably measured is stated at cost, including transaction costs less impairment losses.

All non-trading financial assets and liabilities, originated loans and other accounts receivable, and held-to-maturity investments are measured at amortized cost less impairment losses. Any premium or discount is included in the carrying amount of the underlying instrument and amortized to finance income or expense using the effective interest method.

(iv) Fair value measurement principles

The fair value of financial instruments is based on their quoted market price at the balance sheet date without any deduction for transaction costs.

(v) Gains and losses on subsequent measurement

Gains and losses produced by a change in the fair value of assets with changes through other comprehensive income are recognized directly in equity, until an investment is considered impaired, at which time the loss is recognized in the income statement. When the financial assets are sold, collected, or otherwise disposed of, the cumulative gain or loss recognized in equity is transferred to the income statement.

(vi) Derecognition

A financial asset is derecognized when the Bank loses control over the contractual rights that comprise the asset. This occurs when the rights are realized, expire, or are surrendered. A financial liability is derecognized when it is extinguished.

IFRS 9 introduces the “business model” as one of the conditions for classifying financial assets; it recognizes that an entity may have more than one business model, and that financial assets are reclassified if the aforementioned model undergoes significant or exceptional changes.

According to the standard, the business model refers to the way in which a financial entity manages its financial assets to generate cash flows, which could be from:

1. Collect contractual cash flows
2. Sale of financial assets
3. A combination of both

Given the above, IFRS 9 introduces a new approach to classifying financial assets and requires that they be classified at the time of their initial recording (settlement date) into three valuation categories: (i) amortized cost, (ii) fair value through changes in other comprehensive income (equity) and (iii) fair value through changes in profit and loss.

Classification in these categories will depend on two aspects: the entity's business model (how an entity manages its financial instruments) and the existence or not of contractual cash flows of specifically defined financial assets.

- If the objective of the model is to maintain a financial asset in order to collect contractual cash flows and, according to the conditions of the contract, cash flows are received on specific dates that exclusively constitute payments of principal plus interest, the asset is will be valued at amortized cost.

- If the business model is aimed at both obtaining contractual cash flows and selling them to obtain liquidity and, according to the conditions of the contract, cash flows are received on specific dates that exclusively constitute payments of the principal plus interest, the financial asset will be valued at its fair value through changes in other comprehensive income (equity). Interest, impairment and exchange differences are recorded in results as in the amortized cost model. The rest of changes in fair value are recorded in equity items and may be recycled to profit and loss on their sale.

- Beside these scenarios, the rest of the assets will be valued at fair value through profit and loss. As indicated in the Financial Reporting Regulations, investment funds in open funds must be registered in this category. Due to their characteristics, open investment funds are those that do not present restrictions for their trading, therefore, within this category, mutual funds and money market type investment funds of international markets are included, which can be settled without restriction.

If the objective of an entity's business model undergoes significant changes, the reclassification of the instrument will be mandatory. However, the standard provides that this circumstance occurs very rarely, and when it exists, its disclosure is required according to IFRS 7, Financial Instruments: Disclosure Information.

(g) Cash and cash equivalents

The Bank considers cash and due from banks, demand and term deposits, and investment securities that the Bank has the intent to convert into cash within two months or less to be cash and cash equivalents.

(h) Investments in financial instruments

Investments in financial instruments that are classified at fair value through other comprehensive income are valued at market prices using the price vector provided by Proveedor Integral de Precios de Centroamérica, S.A. (PIPCA).

The effect of market price valuation at fair value through other comprehensive income is included in the equity account named "Adjustment for valuation of investments at fair value through other comprehensive income" until those investments are realized or sold.

In accordance with article 18 of the Financial Reporting Regulation, called IFRS 9, Financial Instruments: Financial Assets, the following is defined:

1. The conventional purchase or sale of financial assets should be recorded applying the accounting on the settlement date.
2. Financial assets are divided into those that are measured at amortized cost and those that are measured at fair value.
3. Based on the business model for managing financial assets and the characteristics of the contractual cash flows of the financial asset, the entity must classify its own investments or joint portfolios in financial assets according to the following valuation categories:

    a. Amortized cost. If an entity, according to its business model and current regulatory framework, classifies a part of its investment portfolio in this category, it will disclose:

        i. The fair value of financial assets classified in this category, in the quarterly financial statements and in the audited annual financial statement.

        ii. The profit or loss that should have been recognized in the result for the period, for the financial statements indicated in the previous section.

    b. Fair value through changes in other comprehensive income.

    c. Fair value through changes in profit or loss: Participations in open investment funds must be recorded in this category.

In accordance with the characteristics that the Bank's portfolio must meet, based both on the Investment Management Policy and the current investment strategy, the management of the Bank's investment portfolio meets the characteristics of a business model whose main characteristic responds to managing financial assets to obtain contractual cash flows, as well as the occasional sales to meet liquidity requirements or investment portfolio management objectives, within the framework of the approved Investment Policy. In accordance with the foregoing, the financial assets that make up the Bank´s investment portfolio meet the conditions to be valued at fair value through changes in other comprehensive income (equity). For purposes of defining a business model, these correspond to the main business model that characterizes the management of the Bank's investment portfolio.

However, it is required to determine the need of a “secondary” business model, whose characteristics of its comprising assets are determined by current regulations. Due to the need to manage liquidity in investment funds that the Bank currently keeps, these financial assets must be classified at fair value through changes in profit and loss, in accordance with the provisions of the Financial Reporting Regulations.

In accordance with the liquidity objectives of the Bank's investment portfolio, the execution of future investments in closed funds does not apply, according to the Entity's business model; however, current investments in these instruments must be classified according with the established Regulation

On the other hand, in accordance with provisions of Law 9274, both the Investment Management Policy of the Development Credit Fund and the current Investment Strategy, management of the investment portfolio in the Development Credit Fund meets the characteristics of a business model whose main characteristic responds to managing financial assets to obtain contractual cash flows, as well as the occasional sales to meet liquidity requirements or investment portfolio management objectives, in the framework of the approved Investment Policy. In accordance with the foregoing, the financial assets that make up the investment portfolio of the Development Credit Fund meet the conditions to be valued at their fair value through other comprehensive income (equity). For purposes of defining a business model, these correspond to the main business model that characterizes the management of the investment portfolio of the aforementioned Fund.

However, it is required to determine the need of a “secondary” business model, whose characteristics of the comprising assets are determined by the current regulation. Due to the need to manage liquidity in investment funds that the Development Credit Fund currently keeps, these financial assets must be classified at fair value through profit and loss, in accordance with the provisions of the Financial Reporting Regulation.

In compliance with the provisions of the Financial Reporting Regulation with respect to IFRS 9, at the meeting of the General Board of Directors of October 29, 2019, the business model for the classification and valuation of own investments in financial assets for the Bank is approved according to the following valuation categories, in accordance with the defined business model:

- Main business model

- Fair value through other comprehensive income (equity): those investments that are part of the investment portfolio will be classified under this category, the objective of which is to obtain contractual cash flows such as their sale and, according to the conditions of the contract, cash flows are received on specific dates that exclusively constitute payments of the principal plus interest.

- Secundary business model

- Fair value through profit or loss: we will classify under this category, those investments in financial assets that, due to their characteristics, do not represent the possibility of generating cash flows on specific dates from the payment of interest according to the financial contract.

- In addition, and by definition of the Financial Reporting Regulation, investments in open funds will be classified at fair value through profit or loss. Financial assets with these characteristics are the following:

- Local money market investment funds.
- International money market investment funds.
- International market mutual funds.

(i) Loan portfolio

SUGEF defines credits as any operation formalized by a financial intermediary irrespective of the type of underlying instrument or document, whereby the intermediary assumes the risks of either directly providing funds or credit facilities or guaranteeing that their customer will honor its obligations with third parties. Credits include loans, factoring, purchases of securities, guarantees in general, advances, checking account overdrafts, bank acceptances, interest, open letters of credit, and preapproved lines of credit.

The loan portfolio is presented at the value of outstanding principal. Interest on loans is calculated based on the outstanding principal and contractual interest rates and is accounted for as income on the accrual basis of accounting. The Bank follows the policy of suspending interest accruals on loans with principal or interest that is more than 180 days past due.

(j) Allowance for loan losses

The loan portfolio is valued in accordance with provisions established in SUGEF Directive 1-05 “Regulation for Qualifying Debtors”, which was approved by CONASSIF on November 24, 2005, published in Official Journal “La Gaceta” No. 238 on Friday, March 9, 2005, and became effective on October 9, 2006.

Loan operations approved for individuals or legal entities with a total outstanding balance exceeding ¢65.000.000 (Group 1 under SUGEF Directive 1-05). From May 23, 2019, the amount of ¢100,000,000 or its equivalent in foreign currency according to the sales rate set by the Central Bank of Costa Rica, is established as the limit of the total outstanding balances from the Credit operations of the debtors referred to in Article 4 of the Regulation for Qualifying Debtors, SUGEF Agreement 1-05. This classification considers the following:

- Creditworthiness, which includes an analysis of projected cash flows, an analysis of financial position, consideration for experience in the line of business, quality of management, stress testing for critical variables, and an analysis of the creditworthiness of individuals, regulated financial intermediaries, and public institutions.

- Historical payment behavior, which is determined by the borrower’s payment history over the previous 48 months, considering servicing of direct loans, both current and settled, in the National Financial System as a whole. SUGEF calculates the level of historical payment behavior for borrowers reported by entities during the previous month.

- Arrears

- Pursuant to the Directive, collateral may be used to mitigate risk for purposes of calculating the allowance for loan impairment. The market value of collateral should be considered and adjusted at least once annually. The percentage of acceptance of collateral is also a mitigating factor. Collateral must be depreciated six months after the most recent appraisal.

Risk categories are summarized below:

Risk category	Arrears	Historical payment behavior	Creditworthiness
A1	30 days or less	Level 1	Level 1
A2	30 days or less	Level 2	Level 1
B1	60 days or less	Level 1	Level 1 or Level 2
B2	60 days or less	Level 2	Level 1 or Level 2
C1	90 days or less	Level 1	Level 1, Level 2 or
C2	90 days or less	Level 2	Level 3
D	120 days or less	Level 1 or Level 2	Level 1, Level 2, Level 3 or Level 4

Loan operations, with a total outstanding balance is less than ¢65,000,000 (Group 2 under SUGEF Directive 1-05). From May 23, 2019, the amount of ¢100,000,000 or its equivalent in foreign currency according to the purchase rate set by the Central Bank of Costa Rica, is established as the limit of the total outstanding balances from the Credit operations of the debtors referred to in Article 4 of the Regulation for Qualifying Debtors, SUGEF Agreement 1-05. Loans are classified in the following categories based on historical payment behavior and arrears:

Risk category	Arrears	Historical payment behavior	Creditworthiness
A1	30 days or less	Level 1	Level 1
A2	30 days or less	Level 2	Level 1
B1	60 days or less	Level 1	Level 1 or Level 2
B2	60 days or less	Level 2	Level 1 or Level 2
C1	90 days or less	Level 1	Level 1, Level 2 or Level 3
C2	90 days or less	Level 2	Level 1, Level 2 or Level 3
D	120 days or less	Level 1 or Level 2	Level 1, Level 2, Level 3 or Level 4

Borrowers are to be classified in risk category E if they fail to meet the conditions for classification in risk categories A through D mentioned above, are in bankruptcy, a meeting of creditors, court protected reorganization procedure, or takeover, or if the Bank considers classification in such category to be appropriate.

From June 2019, according to SUGEF Agreement 15-16, Regulation on Management and Assesment of Credit Risk for the Development Banking System, the its credit portfolio will be subject to risk classification based on the delinquency of the debtor and the number of restructuring that the debtor has been subject of, in any of its operations carried out within the framework of Law 9274, according to the following criteria:

Risk Category	Classification Criteria
1	a. Debtors up to date in the attention of their operations with the entity b. Debtors with delinquency of up to 30 days with the entity
2	a. Debtors with delinquency of more than 30 days and up to 60 days with the entity
3	a. Debtors with delinquency of more than 30 days and up to 60 days with the entity. b. Debtors with delinquency less than 60 days with the entity and have presented delinquency with the SBD greater than 90 days in the last 12 months c. Debtors with delinquency less than 60 days with the entity, that have been subject to at least one restructuration in any operations with the entity during the last 12 months
4	a. Debtors with delinquency of more than 90 days and up to 120 days with the entity b. Debtors with delinquency less than 90 days and have pesented delinquency with the SBD greater than 120 days in the last 12 months c. Debtors with delinquency less than 90 days, that have been subject to at least two restructuration in any operation with the entity during the last 12 months
5	a. Debtors with delinquency of more than 120 days and up to 180 days with the entity
6	a. Debtors with delinquency of moe than 180 days with the entity

The delinquency to be used must correspond to the debtor's maximum delinquency at the end of each month, in any of its operations carried out within the framework of Law 9274, with the entity or with the SBD, as appropriate.

Pursuant to SUGEF Directive 1-05: “Regulation for qualifying Debtors”, as of January 1, 2014, the Bank must maintain a minimum amount of allowance resulting from the sum of generic and specific allowances, calculated in accordance with the Transitory XII.

The generic allowance will be equal to 0.5% of the total due balance, corresponding to the loan portfolio classified in A1 and A2 risk categories, without reducing the effect of mitigators of loan operations which apply to contingent claims.

The specific allowance is calculated on the covered and uncovered portion of each loan. The allowance on the exposed portion is equal to the total outstanding balance of each loan transaction minus the weighted adjusted value of the relevant security. The resulting amount is multiplied by the percentage that corresponds to the risk category. The allowance on the covered part of each credit operation is equal to the amount corresponding to the covered part of the operation, multiplied by the appropriate percentage.

From July 2016, in the case of the loan portfolio of individuals whose coverage ratio of debt service is above the reasonable indicator, an additional generic allowance of 1% should be applied on the indicated basis of calculation. In the case of individuals who have a mortgage or another type of loan (except consumer loans) or are transacting a new loan with the Bank, they will have a reasonable indicator of 35% and for consumer loans of individuals not secured by mortgage, a reasonable indicator of 30%.

The bank must keep this indicator updated, semiannually. SUGEF will verify the compliance in their normal supervisory duties.

In the case of loans denominated in foreign currency debtors placed among unhedged borrowers, an additional generic allowance of 1.5% must also be applied on the basis of calculation.

The indicated generic allowance will be applied cumulatively, so that in the case of unhedged debtors, with an indicator for service coverage greater than the reasonable indicator, the generic allowance applicable will be at least of 3% (0.5% + 1% + 1.5%).

Classification categories and specific allowance percentages for each risk category are as follows:

Risk category	**Specific allowance percentage on the uncovered portion of the loan**	**Specific allowance percentage on the covered portion of the loan**
A1	0%	0%
A2	0%	0%
B1	5%	0,5%
B2	10%	0,5%
C1	25%	0,5%
C2	50%	0,5%
D	75%	0,5%
E	100%	0,5%

As of January 1, 2014, as an exception in the case of risk category E, the minimum allowance for loans to a borrower whose historical payment behavior is rated as level 3 is to be calculated as follows:

Arrears	Specific allowance percentage on the uncovered portion of the loan	Specific allowance percentage on the covered portion of the loan	Creditworthiness (Borrowers Group 1)	Creditworthiness (Borrowers Group 2)
30 days or less	20%	0,5%	Level 1	Level 1
60 days or less	50%	0,5%	Level 2	Level 2
More than 61 days	100%	0,5%	Level 1, Level 2, Level 3 or Level 4	Level 1 or Level 2

From July 2016, pursuant to SUGEF Directive 19-16, Agreement, “Regulation to determine and record of countercyclical allowance”, a generic allowance is applied to that credit portfolio that shows no evidence of current impairment, as determined by the level of allowance expected in periods of economic recession and whose purpose is to mitigate the effects of the economic cycle on the financial results derived from the allowance for non-payment of loan portfolio. On a monthly basis, the Bank must record the expense per counter-cyclical component equivalent to a minimum of 7% of the positive result of the difference between income and expenses, before taxes and profit sharing of each month, until the balance of the account of the countercyclical component reaches the amount corresponding to the required balance of allowance for the entity. At the entry into force of this regulation, the required minimum percentage level of countercyclical allowance is 0.33%.

As of June 30, 2020, the entity reached the target level of contracycical allowance and is under the regulation of the formula established in Article 4 of the “Calculation of the requirement of contracycical allowance” of the Regulation to determine and record countercyclical allowances”, SUGEF 19-16. The entity will continue to accumulate or disaccumulate, in accordance with the methodology established in the aforementioned article and Article 5 “Accounting Registry” of that regulation.

As of June 30, 2020, the total allowance of the loan portfolio reflected in the accounting records amounts to ¢94.815.749.757.

As of June 30, 2020, the increases in the allowance for bad debts resulting from the minimum allowance are included in the accounting records, in compliance with article 17 of SUGEF Agreement 1-05 "Regulation for the qualification of debtors", with prior authorization from the supervising entity, in accordance with article 10 of the Organic Law of the National Banking System.

As of June 30, 2020, management considers the allowance to be sufficient to absorb any potential losses that could be incurred on recovery of the portfolio.

Accounts and accrued interest receivable

To assess the risk of accounts and accrued interest receivable unrelated to loan operations, the Bank considers the arrears of the accounts based on ranges established for other assets in SUGEF Directive 1-05 adopted by CONASSIF.

Arrears	Allowance percentage
30 days or less	2%
60 days or less	10%
90 days or less	50%
120 days or less	75%
More than 120 days	100%

Until IFRS 9, Financial Instruments, is implemented for the credit portfolio of financial intermediaries, the provisions established in the Regulation for the qualification of debtors, to quantify the credit risk and constitute the corresponding allowance, will be maintained in force and the entities will continue to calculate those allowances according to the methodology provided.

(k) Securities sold under repurchase agreements

The Bank enters into sales of securities under repurchase agreements for a certain date in the future at a fixed price. The obligation to repurchase securities sold is reflected as a liability in the separate balance sheet and stated at the value of the original agreement. The underlying securities are held in asset accounts. Finance expense recognized is calculated by the effective interest method. Interest is presented as finance expense in the separate income statement, and accrued interest payable in the separate balance sheet.

(l) Accounting for accrued interest receivable

Interest receivable is accounted for on the accrual basis. Under current regulations, interest accrual is suspended on loan operations that are more than 180 days past due. Accrued interest receivable on those loans is recorded when collected.

(m) Other receivable

The recoverability of these accounts is assessed by applying criteria similar to those established by SUGEF for the loan portfolio. If an account is not recovered within 120 days from the due date or the date recorded, an allowance is created for 100% of the outstanding balance. Accounts with no specified due date are considered payable immediately.

(n) Foreclosed assets

Foreclosed assets are assets owned by the Bank for realization or sale. Included in this account are assets acquired in lieu of payment, assets adjudicated in judicial auctions, assets purchased to be leased under finance and operating leases, goods produced for sale, idle property and equipment, and other foreclosed assets.

Foreclosed assets are valued at the lower of cost and fair value. If fair value is less than the cost recorded in the accounting records, an impairment allowance must be recorded for the difference between both values. Cost is the historical acquisition or production value in local currency, these assets should not be revalued or depreciated for accounting purposes, and they are to be recorded in local currency. The cost recorded in the accounting records for a foreclosed asset may only be increased by the amount of improvements or additions, up to the amount by which they increase the asset's realizable value. Other expenditures related to foreclosed assets are to be expensed in the period incurred.

The net realizable value of an asset should be used as its fair value. The net realizable value is determined by applying strictly conservative criteria and is calculated by subtracting expenses to be incurred on the sale of the asset from its estimated selling price. The estimated selling price of the asset is determined by an appraiser based on current market conditions. Future expectations for market improvements are not considered and it is assumed that the assets must be sold in the shortest period of time possible to enable the Bank to recover the money invested and use it for its business activities. For all foreclosed assets, the Bank should have reports from the appraisers who made the appraisals and those reports are to be updated at least annually. If an asset recorded in this group is used by the Bank, it should be reclassified to the appropriate account in the corresponding group.

Pursuant to article 20-b of SUGEF Directive 1-05, the Regulated Entities are required to book an allowance for retired assets and for foreclosed assets that were not sold or leased under operating or finance leases within two years from the acquisition or production date for an amount equivalent to the carrying amount of the assets. The allowance must be established gradually by recording one-twenty-fourth of the value of such assets each month until the allowance is equivalent to 100% of the carrying amount of the assets, without exception. The recording of the allowance shall begin at month-end of the month in which the asset was i) acquired, ii) produced for sale or lease, or iii) retired from use.

(o) Offsetting

Financial assets and liabilities are offset, and the net amount presented in the separate financial statements when the Bank has a legal right to set off the recognized amounts and intends to settle on a net basis.

(p) Property, furniture and equipment

(i) Own assets

Property and equipment is depreciated on the straight-line method over the estimated useful lives of the assets for both tax and financial purposes. Leasehold improvements are amortized straight line over a period of sixty months, starting the month after the deferred charge is recorded. Leasehold improvements are amortized solely at the end of the term of the lease agreement. When the lessor or the Bank notifies the other party that it does not intend to renew the lease at the end of the original lease term or extension, the remaining balance is amortized over the remainder of the lease term.

Pursuant to requirements established by regulatory authorities, the Bank must have its real property appraised by an independent appraiser at least once every five years, in order to determine its net realizable value. If the realizable value is less than the carrying amount, the carrying amount must be adjusted to the appraisal value.

(ii) Leased assets

Leases in terms of which the Bank assumes substantially all the risks and rewards of ownership are classified as finance leases.

At the beginning of the lease term, this is recognized in the statement of financial position, as an asset and a liability by the same amount, the fair value of the leased assets, or the present value of minimum lease payments, if this were the lowest between the present value of the stipulated payments in the contract discounted at the interest rate implicit in the operation, determined at the beginning of the lease. To calculate the present value of the minimum payments by the lease, the interest rate implicit in the lease is taken as a discount factor, wherever practicable to determine; otherwise the incremental interest rate of the tenant loans is used. Any initial direct cost of the tenant will be added to the amount recognized as an asset.

(iii) Subsecuent cost

Costs incurred to replace a component of an item of property and equipment are capitalized and accounted for separately. Subsequent costs are only capitalized when they increase the future economic benefits. All other costs are recognized in the separate income statement when incurred.

(iv) Depreciation

Depreciation and amortization are charged to the income statement on the straight-line method using the annual depreciation rates established for tax purposes. When appraisals made by independent appraisers determine that the technical useful life is less than the remaining useful life calculated using applicable rates for tax purposes, the technical useful life is to be used. Estimated useful lives are as follows:

	Useful lives
Building	50 years
Vehicles	10 years
Furniture and equipment	10 years
Computer hardware	5 years
Improvements	5 years

(v) Revaluation

At least every five years financial entities should evaluate the real estate by appraisals, stating the net realizable value of the property.

If the realizable value of the assets is different than the one included in the accounting records, the Bank must adjust the book value to the resulting value of the appraisal.

These assets are depreciated by the straight-line method for financial and tax purposes, based on the expected life of the respective assets.

The last appraisal was done on 2015 and the accounting record on November 30, 2015.

(q) Deferred charges

Deferred charges are valued at cost and stated in local currency. These charges are not subject to revaluations or adjustments.

(r) Intangible assets

Intangible assets acquired by the Bank are stated at cost less accumulated amortization and impairment losses.

Amortization of IT systems is charged to profit or loss on a straight-line basis over the estimated useful lives of the related assets. The estimated useful life is five years.

Subsequent expenditures or disbursements are capitalized only when they increase the future economic benefits; otherwise are recognized on results as incurred.

(s) Impairment of assets

The carrying amount of an asset is reviewed at each separate balance sheet date to determine whether there is any indication of impairment. If any such indication exists, the recoverable amount of the asset is estimated.

An impairment loss is recognized whenever the carrying amount of an asset exceeds its recoverable amount. Impairment losses are recognized in the separate income statement for assets carried at cost, and treated as a decrease in revaluation surplus for assets recorded at revalued amounts, until the amount of the surplus of the specific asset is sufficient to absorb the impairment loss.

The recoverable amount of an asset is the greater of its net selling price and value in use. The net selling price is equivalent to the value obtained in an arm’s length transaction. Value in use is the present value of future cash flows and disbursements derived from continuing use of an asset and from its disposal at the end of its useful life.

If in a subsequent period the amount of the impairment loss decreases and the decrease can be linked objectively to an event occurring after impairment loss was determined, the loss is reversed through the separate income statement or separate statement of changes in equity, as appropriate.

SUGEF establishes: regardless of the previously expressed, at least once every five years, financial institutions must have its property appraised by an independent appraiser, in order to determine the net realizable value of property and buildings, whose net book value exceeds 5% of the entity's equity. If the net realizable value of the assets appraised, taken as a whole, is less than the corresponding net carrying amount, the carrying amount is to be reduced to the appraisal value by adjusting assets that are significantly overstated. The decrease in the value of real property for use is taken against account "331 – Adjustments for revaluation of assets".

In cases where an entity is aware of a significant overstatement in the carrying amount of one or more assets, regardless of the cause of the reduction in their value and/or the useful life originally assigned, the entity must hire an appraiser to perform a technical appraisal, immediately notify SUGEF of the results, and book the applicable adjustments in the accounting records.

(t) Obligations with the public

These are current obligations of the resources available to the Bank for the realization of its purposes provided by external sources, which are virtually inescapable and are reasonably identifiable and quantifiable.

(u) Accounts payable and other payables

Accounts payable and other payables are recognized at cost.

(v) Legal benefits (severance)

Costa Rican legislation requires from the Bank and its subsidiaries domiciled in Costa Rica payment of severance benefits to employees dismissed without just cause, equivalent to seven days' salary for employees with three to six months of service, 14 days salary for employees with between six months to one year of service, and compensation in accordance with the Employee Protection Law for those with more than one year of service.

In February 2000, the Employee Protection Law was enacted and published, which modifies the existing severance benefit system and establishes a mandatory supplemental pension plan, thereby amending several provisions of the Labor Code.

Pursuant to the Employee Protection Law, all public and private employers must contribute 3% of monthly employee salaries during the entire term of employment. Contributions are collected through the Costa Rican Social Security Administration (CCSS) and are then transferred to pension fund operators selected by employees.

The Bank follows the practice of transferring to the Employees Association the severance benefits corresponding to each employee based on the employee's current salary.

The amount of severance benefit not transferred to the Association is provisioned in accordance with the employer's legal obligation.

(w) Legal reserve

According to Article 12 of the Organic Law of the National Banking System the Bank sets aside 50% of net earnings after income tax to increase its Legal Reserve.

(x) Revaluation surplus

Revaluation surplus included in equity may be transferred directly to undistributed profits when the surplus is realized. The whole surplus is realized on the retirement, disposal, or use of the asset corresponding. The transfer of revaluation surplus to prior period retained earnings should not be made through the separate income statement. The Bank was authorized by SUGEF to capitalize revaluation surplus by increasing share capital.

(y) Use of estimates

Management has made several estimates and assumptions relating to the reporting of assets, liabilities, profit or loss, and the disclosure of contingent liabilities in preparing these separate financial statements. Actual results may differ from those estimates. Material estimates that are particularly susceptible to significant changes are related to the determination of the allowance for loan impairment.

(z) Recognition of main types of revenue and expenses

(i) Financial income

Financial income and expense are recognized in the separate income statement as it accrues considering the effective yield or interest rate. Financial income and expense include amortization of any premium or discount during the term of the instrument and until its maturity and is calculated on an effective interest basis.

(ii) Fees and commissions income

When loan originated fees are generated, they are taken against effective yield, and they are deferred over the loan term. Service fees and commissions are recognized when the services are rendered. In the case of other commissions related to the provision of services, these are recognized when the service is provided.

(iii) Net income on trading securities

Net income on trading securities includes gains and losses arising from sales and from changes in the fair value of trading assets and liabilities.

(iv) Operating lease expenses

Payments for operating lease agreements are recognized in the separate income statement over the term of the lease.

(aa) Income tax

Pursuant to the Income Tax Law, the Bank and its subsidiaries are required to file their income tax returns for the twelve months period ending December 31 of each year.

(i) Current

Current tax is the expected tax payable on taxable income for the year, using tax rates enacted at the separate balance sheet date, and any adjustment to tax payable in respect of previous years.

(ii) Deferred

Deferred tax is provided using the balance sheet liability method, providing for temporary differences between the carrying amounts of assets and liabilities for financial purposes and the amounts used for taxation purposes. In accordance with this method, temporary differences are identified as either taxable temporary differences (which result in future taxable amounts) or deductible temporary differences (which result in future deductible amounts). A deferred tax liability represents a taxable temporary difference, while a deferred tax asset represents a deductible temporary difference. A deferred tax asset is recognized only to the extent there is a reasonable probability that it will be realized.

(bb) Pension, retirement and outgoing personnel

A fund was created by Law No. 16 of November 5, 1936, which has been amended on a number of occasions. The most recent amendment was included in Law No. 7107 of October 26, 1988. Pursuant to Law No. 16, the fund was established as a special wage protection and retirement system for the Bank's employees. The fund is comprised of allotments established by the laws and regulations related to the fund, and monthly contributions made by the Bank and employees equivalent to 10% and 0.5% of total wages and salaries, respectively. As of October 1, 2007, this fund is managed by BCR Pensión Operadora de Planes de Pensiones Complementarias, S.A. (subsidiary) under a comprehensive management agreement.

The Bank's contributions to the fund are contribution plans. Consequently, the Bank has no additional obligations.

(cc) Statutory allocations

Under article 12 of IRNBS, the net earnings of commercial State-owned banks are allocated as follows: 50% to a legal reserve; 10% to increase the capital of the National Institute for Cooperative Development (INFOCOOP); and the remainder to increase the Bank's capital, pursuant to article 20 of Law No. 6074. Transition provision III of Law No. 8634 "Development Banking System" establishes that for a five-year period starting in 2007, the contributions made by State-owned banks equivalent to 5% of their annual net earnings (prescribed by article 20 of the Law for the creation of the National Commission for Educational Loans (CONAPE) will be allocated as follows: two percent (2%) to CONAPE and three percent (3%) to the capital of the Development Financing Fund (FINADE). On January 2013 transitory III is removed and will continue calculating a 5% for CONAPE, in accordance with law 9092, Return of Income of the National Commissions for Educational Loans.

In accordance with article 46 of the "National Emergency and Risk Prevention Act", all institutions of the central administration and decentralized public administration, as well as State-owned companies, must contribute three percent (3%) of their reported earnings before taxes and statutory allocations and of their accumulated budget surplus to CNE. Such funds are deposited in the National Emergency Fund to finance the National Risk Management System.The expenditure for CNE is calculated as 3% of income before taxes and profit appropriations.

Pursuant to article 78 of the Employee Protection Law, State-owned public entities must contribute up to 15% of their earnings with the purpose of strengthening the funding base for the Disability, Old Age, and Death Benefit System of CCSS and to provide universal CCSS coverage for impoverished non-salaried workers. According to Executive Decree number 37127-MTSS, beginning in 2013 a progressive yearly contribution from net earnings must be set aside beginning with 5% in 2013, up to 7% beginning in 2015 and 15% in 2017.

(dd) Development Financing Fund

In accordance with article 32 of Law No. 8634 "Development Banking System", all State-owned banks, except Banco Hipotecario para la Vivienda (BANHVI), shall appropriate each year at least five percent (5%) of their net earnings after income taxes to the creation and strengthening of its own development funds. The objective of that appropriation is to provide financing to individuals and legal entities that present viable and feasible projects in conformity with the provisions of the law (See note 35).

(ee) Development Credit Fund

The Development Credit Fund (DCF), comprised of the resources provided in Article 59 of the Organic Law of the National Banking System, No.1644, commonly called "Banking Toll," will be managed by the State Banks. In compliance with Law No. 9094 "Derogatory of Transitory VII-Law No. 8634," and in accordance with Article 35 of Law No. 8634 "Development Banking System", in meeting 119 of January 16, 2013, by agreement number AG 1015-119-2013, it is agreed to appoint Banco de Costa Rica and Banco Nacional de Costa Rica as managers for a five-year period from the signature of the respective management agreements. Each bank is responsible for managing fifty percent (50%) of the Fund.

The Technical Secretariat of the Governing Board through written communication CR/SBD-014-2013 informed all private banks to open up checking accounts with each of the administrators' banks (Banco Nacional and Banco de Costa Rica), both in colones and foreign currency with the obligation to distribute fifty percent of the resources to each bank.

The powers granted by the Governing Board to the Administrators are:

a) Administrators' banks can perform services with the beneficiaries of the Development Banking System as recognized by Article 6 of Law 8634.

b) In accordance with Article 35 of the Law 8634 with funds from the Development Credit Fund the Banks can perform services for other financial entities, except for private banks provided they meet the objectives and obligations under Law 8634 and that are duly accredited by the Board.

c) The Banks may proceed or carry on in accordance with Article 35 Law 8634 the resources of the Development Credit Fund through: associations, cooperatives, foundations, NGO, producers organizations or other entities if they have credit operations in programs that meet the objectives established in the Law 8634 and are duly accredited by the Board.

The contract signed for a five years term will be renewable for equal and successive periods unless otherwise decided by the Governing Board, notified in writing at least three months in advance. It may be terminated as provided for in Article 12 paragraph j) of the Law 8634 and its executive regulations, if the Banks Administrators demonstrate proven lack of capacity and expertise. (See note 36).

(ff) Economic period

The economic fiscal period corresponds to the period ended on December 31 of every year.

(2) Collateralized or restricted assets

The collateralized or restricted assets are as follows:

		June 2020
Cash due from banks (see note 4)	¢	529.901.603.592
	¢	**529.901.603.592**

(3) Balances and transactions with related parties

The separate financial statements include balances and transactions with related parties, as follows:

		June 2020

	¢	**2.786.820.396.772**

(c) Loan porfolio by arrears

The loan portfolio by arrears is detailed as follows:

		June 2020
Current	¢	2.584.814.136.538
De 1 a 30 días		74.550.439.383
31 to 60 days		47.804.097.168
61 to 90 days		52.049.129.854
91 to 120 days		18.208.521.136
121 to 180 days		23.843.133.984
More tan 181 days		62.323.654.635
	¢	**2.863.593.112.698**

The Bank classifies as past due and delinquent those loans that have not made principal or interest payments for one day after the agreed date.

(d) Past due loans

The past due loans, including loans in accrual status and unearned interest on past due loans, are as follows:

		June 2020
Number of operations		2.171
Past due loan in nonaccrual status	¢	62.323.654.636
Past due loans in accrual status	¢	216.455.321.525
Total, unearned interest	¢	8.339.743.210

Loans in legal collections as of June 30, 2020:

No. of loans	Percentage		Balance
1.285	1,86%	¢	53.236.262.586

As June 30, 2020, the average annual interest rate earned on loans is 9,06% in colones and 6,38% in U.S.

(e) Accrued interest receivable on loan portfolio

Interest receivable by economic sector are detailed as follows:

		June 2020
Loans - Personal	¢	16.018.675.105
Loans Development Banking System		304.892.547
Loans - Business		2.533.200.616
Loans - Corporate		14.629.485.585
Loans – Public Sector		555.376.355
Loans – Financial Sector		552.981.242
	¢	**34.594.611.450**

Interest receivable by aging are detailed as follows:

		June 2020
Current loans	¢	26.034.930.573
Past due loans		6.198.089.875
Loans in legal collections		2.361.591.002
	¢	**34.594.611.450**

(f) Allowance for loan impairment

Movement in the allowance for loan impairment, is as follows:

2020 opening balance	¢	**86.096.482.964**
Plus:		
Allowance charged to profit or loss (see note 25)		18.365.642.278
Transfer of balances		285.590.362
Adjustment for foreign exchange differences		1.004.343.101
Less:		
Adjustment for foreign exchange differences		(259.391.390)
Transfer toupaid balances		(2.255.228.706)
Reversal of allowance against income (see note 26)		(8.421.688.852)
Balance as of June 30, 2020	¢	**94.815.749.757**

(g) Syndicated loans

As of June 30, 2020, the Bank's syndicated loan portfolio is as follows:

	Number of Operations		Syndicated balance other	Syndicated balance BCR	Total balance
Banco Internacional de Costa Rica, S.A.	3	¢	7.068.032.531	12.239.425.642	19.307.458.173
	3	**¢**	**7.068.032.531**	**12.239.425.642**	**19.307.458.173**

These operations did not generate the Bank revenue for the administration of syndicated loans.

(7) Foreclosed assets, net

The foreclosed assets are presented net of the allowance for impairment and per legal requirement, as follows:

		June 2020

Depósito Agrícola de Cartago S.A.		900.692.181
		50.948.647.203
Foreign entities:		
Banco Internacional de Costa Rica, S.A. and subsidiary		71.224.640.433
	¢	**122.173.287.636**

As of June 30, 2020, BCR Pensiones S.A. Operadora de Planes de Pensiones Complementarias S.A. distributed dividends in the amount of ¢3.000.000.000, in compliance with resolution of the Extraordinary General Shareholder´s Meeting Nº 20-2020, from Juna 2, 2020.

Banco Internacional de Costa Rica, S.A. and subsidiary (BICSA) was organized as a bank under the laws of the Republic of Panamá in 1976. It operates under a general license granted by the Superintendence of Banks of Panama to engage in banking transactions in Panama or abroad. BICSA is in the city of Panama, Republic of Panama, BICSA Financial Center, 50 floor, Avenida Balboa and Calle Aquilino de la Guardia.

The Bank owns a 51 % ownership interest in BICSA (domiciled in Panamá). As of June 30, 2020, that ownership interest is represented by 6.772.137 ordinary shares of US$10 par value each. Banco Nacional de Costa Rica owns the remaining 49% of shares.

The Bank follows the policy of adjusting the value of its investment in BICSA by the equity method. In applying this policy, the Bank considers the entity's results of operations, as well as the variation in equity (in colones) arising from adjustments to equity by applying the year-end exchange rate with respect to the U.S. dollar, in addition to changes resulting from revaluations. Such variation results from the fact that BICSA's accounting records are kept in U.S. dollars.

The Bank's income statement as of June 30, 2020 includes ¢795.605.556, respectively, for BICSA's result of operations.

The Bank's income statement for the period ended June 30, 2020 includes an amount of ¢795,605,556, corresponding to BICSA's net operating results.

The Bank's statement of changes in equity for the period ended June 30, 2020, includes an increase in equity for ¢1.834.418.287, corresponding to changes arising from translation of BICSA's financial statements.

(9) Property and equipment

As of June 30, 2020, property and equipment is as follows:

	¢	**44.079.103.882**	**10.496.948.011**	**0**	**33.582.155.871**

(15) Income tax

Pursuant to the Costa Rican Income Tax Law, the Bank is required to file income tax returns for the twelve months ending December 31 of each year.

As of June 30, 2020, the Bank's separate balances of income tax payable and expected income tax amount to ¢4.851.472.512 (see note 17) and ¢2.741.496.239 are recorded as "Other assets".

The income tax expenses are as follows:

		June 2020
Current tax	¢	7.308.087.495
Income tax adjustment for the previous period		(2.456.614.983)
		4.851.472.512
Decrease in deferred income tax		(76.213.439)
Income tax	¢	4.775.259.073

		June 2020
Realization of deferred income tax	¢	76.213.439

A deferred tax liability represents a taxable temporary difference and a deferred tax asset represents a deductible temporary difference.

As of June 30, 2020, deferred tax assets and liabilities are attributed to the following:

		Assets	Liabilities	Net
Valuation of investments	¢	577.279.888	(2.504 398.469)	(1.927.118.581)
Revaluation of buildings		0	(5.200 866.677)	(5.200.866.677)
Total	¢	**577.279.888**	**(7.705.265.146)**	**(7.127.985.258)**

Movement of temporary differences is as follows:

As of June 30, 2020:

		December 31, 2019	Income statement	Equity	June 30, 2020
Liabilities account					
Valuation of investments	¢	(3.834.489.662)	0	1.330.091.193	(2.504.398.469)
Revaluation of buildings		(5.277.080.116)	76.213.439	0	(5.200.866.677)
Assets account					
Valuation of investments		981.374.269	0	(404.094.381)	577.279.888
Total	¢	**(8.130.195.509)**	**76.213.439**	**925.996.812**	**(7.127.985.258)**

The tax receivable balance originated by an excess of advanced payments for the returns on investments of the Development Credit Fund which are exempt from the obligation and for income tax advances, are detailed as follows:

		June 2020
Income tax receivable	¢	70.079.008
Supported value added tax	¢	581.567.644
		651.646.652

IFRIC-23 "Uncertainty over income tax treatments" introduces the concept of uncertain tax treatment, which starts after the tax administration begins a process of transferring charges, from which on the entity is already facing an uncertain tax treatment since the tax authority has already indicated that it does not accept the treatment provided, and therefore it is in dispute. In such case what proceeds is to reflect the uncertainty according to the method that better predict its resolution and by recording the corresponding provision. The data of the provision made is detailed:

		June 2020
Banco de Costa Rica	¢	35 072 116 918
		35 072 116 918

(16) Provisions

Movement in provisions is as follows:

Commissions payable for insurance placement		322.454.367
Commissions payable related parties		777.808.327
Sundry creditors		22.488.154.469
	¢	**69.114.851.472**

Sundry creditors record accounts payable and commissions not specified in the above concepts that mainly correspond to transactions by supplier invoices, constitution of companies, placement of policies, withholdings payable, transactions with checking and savings accounts.

(18) Equity

a) Capital

The Bank's capital is comprised as follows:

		June 2020
Capital under Law 1644	¢	30.000.000
Bank capitalization bonds		1.288.059.486
Capital increase under Law 7107		118.737.742.219
Capital increase under Law 8703		27.619.000.002
Capital increase under Law 9605		18.907.432.694
Increase from revaluation of assets		14.130.125.230
Other		697.630.970
	¢	**181.409.990.601**

On December 23, 2008, the Executive Branch of the Costa Rican Government authorized a capital contribution funded under Law No. 8703 "Amendment to the Law on the Ordinary and Extraordinary Budget of the Republic for Tax Year 2008 (Law No. 8627)". Such law grants funds to capitalize three State-owned banks, including the Bank, in order to stimulate productive sectors, particularly small and medium-sized enterprises. For such purposes, the Bank handed over four securities for a total of US$50.000.000 equivalent to ¢27.619.000.002.

As of June 30, 2020, the amount for the constitution of the Development Financing Fund's equity is ¢33.309.728.460. En cumplimiento de la Ley 9605 "Fusión por absorción del Banco Crédito Agrícola de Cartago y el Banco de Costa Rica." se trasladó la suma de ¢2.627.265.346 del patrimonio administrado por la entidad.

b) Surplus from revaluation of property and equipment

Corresponding to the increase in fair value of property owned by the Bank, as of June 30, 2020, revaluation surplus amounts to ¢37.774.830.067.

c) Adjustments for revaluation of available-for-sale investments

They include variations in the fair value of available-for-sale investments.

As of June 30, 2020, the balance of the adjustment for valuation of available-for-sale investments corresponds to unrealized net losses in the amount of ¢9.618.609.321.

d) Adjustment for valuations of investments in other companies

This item mainly corresponds to foreign exchange differences arising from conversion of BICSA's financial statements and the unrealized gain or loss on valuation of investments and other changes in subsidiaries.

As of June 30, 2020, changes in equity include foreign exchange differences corresponding to investments in other companies in the amount of ¢6.860.739.218.

Regulatory Capital

As of June 30, the primary and secondary capital of the Bank is detailed as follows:

		June 2020
Primary Capital		
Ordinary paid capital	¢	181.409.990.601
Legal reserve		283.820.516.011
		465.230.506.612

Ajustment for valuation of property		28.331.122.550
Adjustment for valuation of restricted financial instruments		(2.458.552)
Adjustment for valuation of shares in other companies		6.860.739.218
Retained earnings from previous periods		13.464.953.148
Results of the period		11.336.856.115
Development Financing Fund		33.309.728.460
		93.300.940.939
Deductions		
Participation in other companies		(122.173.287.636)
Total regulatory capital	¢	**436.358.159.915**

(19) Commitments and contingencies

The Bank has off-balance sheet commitments and contingencies that arise in the normal course of business and involve elements of credit and liquidity risk.

Off-balance financial instruments with risk are as follows:

		June 2020
Guarantees:		
Performance bonds	¢	98.465.572.554
Bid bonds		3.713.854.283
Letters of credit issued, not negociated		6.834.735.719
Letters of credit confirmed, not negociated		1.100.426.664
Credit lines to be used automatically		121.478.019.427
Other contingencies		66.189.755.625
Credits pending disbursement		1.389.422.607
	¢	**299.171.786.879**

Off-balance financial instruments with risk by type of deposit are as follows:

		June 2020
With prior deposit	¢	11.697.927.593
Without prior deposit		221.284.103.661
Pending litigation and claims		66.189.755.625
Total deposits	¢	**299.171.786.879**

These commitments and contingent liabilities expose the Bank to credit risk since commissions and losses are recognized in the financial statements until the obligations are fulfilled or expire.

As of June 30, 2020, letters of credit are backed up by 100% of the stand-by balance or by lines of credit.

As of June 30, 2020, floating guarantees in custody are for ¢253.151.118.237.

Other contingencies:

As of June 30, 2020, the Bank's Legal Division reported the following contingencies and commitments:

- Administrative suits against the Bank estimated at ¢23.004.371.483 and US$64.332.922. In addition, other contentious processes are filed for preliminary injunction with no estimate.

- Ordinary labor suits estimated at ¢3.453.755.473 and US$825.001.

- Criminal proceedings in which the Bank is a third-party defendant estimated at ¢1.700.475.429 and US$10.077.

- Administrative proceedings against the Bank have been estimated in the amount of ¢4.993.517 y US$2.200.

(20) Trusts

The Bank provides trust services, whereby it manages assets at the direction of the customer. The Bank receives a fee for providing those services. The underlying assets and liabilities are not recognized in the Bank's separate financial statements. The Bank is not exposed to any credit risk and it does not guarantee these assets or liabilities.

The types of trusts managed by the Bank are as follows:

- Management and investment trusts
- Management trusts with a testamentary clause
- Guarantee trusts
- Housing trusts
- Management and investment public trusts.

The assets in which capital trust is invested are detailed as follows:

		June 2020
Cash and due from bank	¢	87.805.192.797
Investment		66.611.787.831
Loan portfolio		12.647.217.439
Allowance for loan losses		(9.641.974.028)
Foreclosed assets		27.356.772.856
Investment in other companies		31.194.867.935
Other receivables		76.179.835.270

	¢	**4 666 756 274**	**1 419 593 819**

As of June 30, 2020, there are not decreases in the legal allocations of the period's profits.

(31) Components of other comprehensive income

The components of other comprehensive income are as follows:

		June 2020		
		Amount before income tax	**Profit (expense)**	**Net taxes**
Adjustment for valuation of available-for sale investments	¢	1 297 222 050	925 996 812	2 223 218 862
Exchange differences for conversion of financial statements, foreign entities		1 834 418 287	0	1 834 418 287
Changes in equity from foreign subsidiaries		(243 993 196)	0	(243 993 196)
Change in equity of subsidiaries from unrealized profit		(799 987 698)	0	(799 987 698)
	¢	**2 087 659 443**	**925 996 812**	**3 013 656 255**

(32) Operating leases

The Bank as tenant

Non-cancellable operating leases are payable as follows:

		June 2020
Less than one year	¢	457 581 600
Between one and five years		343 186 200
More than five years		0
	¢	**800 767 800**

(33) Fair value

Fair values of financial instruments are as follows:

		June 2020	
		Carrying amount	**Fair value**
Cash and due from banks	¢	656 032 207 152	656 032 207 153
Investment		1 101 189 551 573	1 092 473 985 555
Loan portfolio		2 881 636 146 530	2 723 834 373 758
		4 638 857 905 255	4 472 340 566 466
Demand deposits		2 239 784 678 831	2 239 784 678 831
Term deposits		1 514 535 069 663	1 493 376 120 812
Finacial obligations		446 585 751 827	458 377 823 911
	¢	4 200 905 500 321	4 191 538 623 554

Where practicable, the following assumptions were used by management to estimate the fair value of each class of financial instrument both on and off the balance sheet:

(a) Cash and cash equivalents, accrued interest receivable, other receivables, demand deposits and customer savings deposits, accrued interest payable, and other liabilities.

The carrying amounts approximate fair value because of the short maturity of these instruments.

(b) Investments in financial instruments

The fair value of available-for-sale financial instruments is based on quoted market prices or prices quoted by brokers.

(c) Securities sold under repurchase agreements

The carrying amount of funds owed under repurchase agreements maturing in one year or less approximates their fair value because of the short maturity of these instruments.

(d) Loan portfolio

Management determined the fair value of the loan portfolio by the discounted cash flow method.

(e) Deposits and loans payable

Management determined the fair value of deposits and loans payable by the discounted cash flow method.

Fair value estimates are made at a specific date, based on relevant market information and information concerning the financial instruments. These estimates do not reflect any premium or discount that could result from offering for sale a particular financial instrument at a given date. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and, therefore, cannot be determined with precision. Estimates could vary significantly if changes are made to those assumptions.

(34) Risk Management

Comprehensive Risk Management

Sophistication and uncertainty of financial markets involve managing risks that may impair the value of entities and of third-party resources it manages. Given this reality, the Bank implemented a System of Comprehensive Risk management (hereinafter Sigir or Sytem), enabling it to achieve a proper balance between the expected benefits of the business strategy and the acceptance of a certain level of risk, through an effective risk-based management.

Corporate governance of the risk management area

Boards of Directors, committees, and senior managers of member institutions of the Financial Conglomerate strengthen and ensure the above mentioned Sigir, aware of its contribution to the improvement of institutional processes, and hence to the achievement of objectives and goals.

Corporate risk management is led by the Risk Management and Control Area, Regulations with dependence on the General Board of Directors, and which has various administrative units responsible for the specific and comprehensive management of relevant risk to which the entity is exposed while in the subsidiaries there are risk managing areas responsible for this work.

Objective of the Comprehensive Risk Management System

The System aims to generate information that will support the decision making to locate the Financial Conglomerate at a risk level consistent with its profile and risk appetite as well as it business flows, complexity, operations volume and economic environment, and thus lead to the achievement of institutional objectives and goals.

General Risk Principles and Policies

The Conglomerate has policies, strategies, and other corporate regulations for an effective comprehensive risk management, as follows:

- A robust regulatory framework to provide legal, technical and administrative certainty for the functioning, evaluation and improvement of the Sigir.
- Strategies that seek to strengthen the system's maturity level.
- The risk management culture is promoted at all levels of the organization, thereby raising awareness of the importance of effective risk-based management.
- Methodologies and measurement models are available for the valuation of the different types of risk, which are periodically subjected to retrospective and stress tests, to adjust the variables and factors that influence the exposure to risks.

- Updated tools and systems are available to meet the needs of managing each type of risk.
- Risk and contingency management plans are in place to deal with situations that prevent the fulfillment of the stated objectives, as well as for materialized events whose consequences may generate negative impacts on the entities.

Classification of significant risks

The relevant risks to the Bank are classified as follows:

Financial
Credit
• Loan portfolio
• Investment portfolio (counterparty)

Market
• Liquidity
• Exchange rates
• Interest rates
• Price

Operational
• Operating
• Legal
• Technological

Other
• Strategic
• Reputational
• Trust management
• Securitization management
• Conglomerate (intragroup)
• Money laundering and terrorism financing

Risk profile and limit structure

The members of the Conglomerate define a risk profile for each entity, which is approved by the corresponding Board of Directors, and according to which, parameters of acceptability, appetite, tolerance limits and risk indicators defining the exposure levels to assume, are established, thereby generating alerts to deviations from normal behavior, enabling timely decision making.

Process of comprehensive risk management

The process in risk assessments includes identification, analysis, evaluation, management, review, documentation, and risk communication.

Types of risk assessments

The process in risk assessments includes qualitative and quantitative assessments. The first correspond to specific analysis of the objectives of activities and substantial processes of the Conglomerate. The second refers to global analysis with quantitative risk measurements using mathematical and statistical methods and models.

In addition, during the period under study, the management generated reports about risk on new services and products or modification to existing ones, which are issued prior to its release to the market or the contracting of services.

Risk control framework

Risk Control arises as result of the operation of the Internal Control System established in each of the BCR Financial Conglomerate members, incorporating flow of processes and internal control activities to minimize risk exposure.

The established risk assessments generate various alerts, recommendations, and risk management plans, contributing to its overall and specific mitigation. In addition, there are contingency plans for unexpected events that may affect compliance with the risk tolerance limits, supporting the sustainability, solvency and value of the conglomerate's members.

In addition, there is a continuous monitoring of tolerance limits and risk indicators, to reflect the degree of exposure in which each of its relevant risk types is found. Contingency plans are available to deal with unexpected events that affect compliance.

Mitigation coverage

In accordance with the regulations, estimates and provisions are maintained. Implemented risk assessment models seek to establish additional capital requirements to cover non-expected losses. Likewise, BCR net worth equity indicator is evaluated to analyze its ability to respond to different types of risk, which, during the period under study, was higher than the 10% limit established by the General Superintendence of Financial Institutions.

Evaluation of the effectiveness and maturity of the System

Risk managing areas apply critical judgment on the effectiveness and maturity of the Sigir using self-assessment tools for continuous improvement. Annually, a Model of Corporate Maturity is applied to evaluate the progress in management by type of risk. The results of this assessment are used to define strategies and work plans.

Information generated by the Comprehensive Risk Management System

During the period under analysis, the system generated timely and periodic reports for the Boards of Directors, Committees and other risk-taking areas of the Conglomerate as a result of the Comprehensive Risk Management, or by the occurrence of significant events that should be known of for suitable decision making based on risk exposure and risk based business management.

(a) Credit risk management

Definition

The credit risk is the possibility of economic losses due to non-compliance with the conditions agreed upon by the debtor.

Management of this risk contributes to the strength of BCR's equity in the long term by providing both tools and information to improve decision making, minimize losses and maintain risk exposure of the loan portfolio within established parameters.

The General Board of Directors of the BCR has defined management strategies to control credit risk from portfolios to individual debtors, using tools and methodologies framed within the existing regulations developed internally.

Management methodology

In general, models and systems measuring credit risk that accurately reflect the value of the positions and their sensitivity to various risk factors are applied in corporative information from reliable sources. Further, the Regulator issued adjustments to prudential regulations to enable the actions that financial entities can take to help clients: Executive Decree No. 42227-MP-S, Guideline 075-H, SUGEF 1-05, Transitory XVI and Transitory XVII, La Gaceta 105, Guideline 083-H.

The statistical support is complemented with expert criteria to analyze the borrower's ability to pay, as well a stress analysis on exposures to macroeconomic variables that are related to microeconomic and Bank's internal variables.

Specifically, for the quantitative analysis of the loan portfolio, there is a model to quantify the average of expected loss, value at Risk (VaR), and economic capital, which is aligned with the standarads of Basel II.

Moreover, the risk inherent to the activities and products of the Bank is identified and analyzed, as well as its feedback to the organization through the Executive Corporate Committee. Finally, there are limits to exposure to credit risk, to control exposure levels.

Exposure and risk management

During the first months of 2020, the loan portfolio had been trending towards an acceptable risk level for all its indicators, however, due to the Covid-19 pandemic and its repercussions on the economy, many of the Bank´s clients had to suspend the production cycle or they have stopped receiving their income in the case of individuals. In this situation, the Bank is in a second phase of granting grace periods to debtors affected by the pandemic.

As of June 2020, the percentage of arrears greater than 90 days was 3,94% (2,69% March 2020). The latter indicator is 0,06 percentage points below the regulatory limit to be in the normal range, with retail banking activities showing the highest delinquency.

The dollar portfolio accounts for 31.56% (31,48% March 2020, respectively) of the total portfolio. It is important to mention, the loan portfolio has been managed strategically to attract customers with an acceptable risk profile. In addition, regular monitoring of the loans in foreign currency is given, and the portfolio of clients not generating income in foreign currency.

The activities with greater relative importance are housing, services and commerce, as shown in note 6.a of the financial statements (Loan Portfolio by Sector), limits on exposition for the loan portfolio are defined, to achieve a loan structure in the medium and long term that is consistent with the risk appetite established by the Senior Management.

In addition, appropriate and timely communication mechanisms on exposure of the Bank to credit risk are implemented at all levels of the organizational structure, thus allowing a prospective view of the impact on the credit estimates and equity. The reports consider both the exposure resulting from position taking and possible deviations arising regarding the limits and defined tolerance levels.

Also, the commercial area is kept informed on the inherent risks of the economic activities associated with credit underwriting, through specific studies, as well as new credit instruments the Bank is planning to offer.

With respect to the counterparty risk of the investment portfolio, compliance with the internal investment limits per issuer is monitored weekly. In addition, as of January 2020, the calculation of the expected loss for the investment portfolio under IFRS 9 begins.

The maximum exposure to credit risk is represented by the carrying amount of each financial asset:

Total			**180.073.940.587**	**5**

(b) Market risk management

Definitions

Market risk refers to potential losses that may occur in the value of assets and liabilities in the balance sheet due to adverse movements in the factors that determine their price, also known as risk factors, such as liquidity, interest rates, exchange rate and inflation, including the portfolios under management.

The liquidity risk is generated when the financial entity cannot meet the requirements or obligations with third parties due to insufficient cash flow, resulting from the outcome between term recoveries (asset operations) and term obligations (liability operations), or to improper price formation mechanism that disables the price to transform an asset and/or liability into cash.

Price of assets and inflations risk measures the potential losses that may occur in financial assets included in the Investment portfolios, and a decline in the purchasing power of the cash flows received by the Bank.

The risk of interest rates measures the possibility that the entity incurs in losses as a result of changes in the present value of assets and liabilities in which the Bank holds positions on or off balance.

The exchange rate risk is the possibility of economic loss due to variations in the exchange rate. This risk also arises when the net result of the exchange rate adjustments does not compensate proportionally the adjustment in the value of assets in foreign currency, causing a reduction in the equity indicator or in any model affected negatively in the determination of the exchange rate risk by variations in this macro price, as in Camel's indicators or own statisticians.

Management methodology

Regarding the management of market risk for the BCR's investments portfolio (Delta Normal) daily monitoring of risk factors (interest rates and exchange rate) impact is given through the Value at Risk methodology (VaR).

In addition, the risk derived from the Price quotations of financial instruments in the market is monitored through the methodology of historical simulation of VaR calculations established in SUGEF's agreement 3-06; this allows the entity to manage the impact of this risk on the net worth adequacy.

In terms of interest rates, the Bank is sensitive to this type of risk due to the mix of rates and terms, both in assets and liabilities. This sensibility is mitigated through the management of variable rates and the combination of terms monitored by internal models.

Counterparty risk management is carried out through the fulfillment of the investments profile established by the Bank in its internal policies, and the reporting of issuers, which analyzes the financial statements and the default risk by issuers, according to internal studies and risk rating. These limits are monitored weekly as established in the policies for managing the BCR's investment in securities.

The management of the liquidity risk is periodically assessed by daily updating of the BCR projected cash flows to six months through an automated application, for the preparation of the gap report to one and three months both in colones and in US dollars.

To decrease the liquidity risk, following variables are taken into consideration: deposits volatility, debt levels, liability structure, and liquidity degree of assets, availability of funding and the overall effectiveness of the gap of timelines.

Tolerance limits and risk indicators

The main indicators for controlling the market risk limits are the following:

- Liquidity risk: maximum expected collection received from the public by currency, term matching to one and three months by currency and coverage of Liquidity Index (ICL) by currency.
- Price risk: VaR of the Investment portfolio through internal models and regulalations.
- Exchange risk: Sensibility of the equity position in foreign currency through internal models.

  Each of the previous indicators has parameters of acceptability and limits that are approved by the General Board of Directors.

Exposure and risk management

(c) Liquidity risk

Facing the global crisis caused by the COVID-19 pandemic, the Bank continues with the implementation of the liquidity strategy to face the increase in the volatilities of deposits from the public, thus addressing the preference of clients to keep balances at demand instead of at term.

Cash and cash equivalents show a year-on-year decrease of 19.34%, in almost all items except cash, checking accounts and demand deposits in foreign financial institutions and restricted availabilities (see cash and cash equivalents table in note 2).

Demand deposits increased by 16.44% on a year-on-year basis, due to the increase in current account balances, demand savings deposits and other demand obligations with the public (see chart of demand obligations with the public in note 4).

Wholesale funding decreases by 0.57% on a year-on-year basis, mainly due to the decrease in the overdraft account in demand checking accounts in foreign financial entities. (See table of obligations with financial institutions and the Central Bank in note 5 of this document).

As of June 30, 2020, the Bank´s liquidity coverage indicator (ICL) was of 1.62 times in colones and 1.29 times in US dollars, complying satisfactory values for the limits defined by SUGEF of 1 and according to the entity's risk profile.

In the following table, the results for the end of June 2020 are observed:

	June 2020
Liquidity coverage indicator (colones)	1.64
Liquidity coverage indicator (US dollars)	1.29
Regulatory limit	1

On the other hand, the term matches, another regulatory indicator, had the following results as of June 30, 2020:

Regulatory liquidity matches by currency and term

Indicator	Interpretation	Observation	Approved levels	
1-month term matching US dollars	Ratio between assets and liabilities with account´s volatility	1.53	Limit:	1.10
1-month term matching colones		1.63	Limit:	1.00
3-months term matching US dollars		1.28	Limit:	0.94
3-months term matching colones		1.06	Limit:	0.85

The term matches show a constant and significant loose with respect to regulatory limits, which is a direct effect of the measures taken in the strategy for compliance with the Liquidity Coverage Indicator but mainly to attend to the emergency due to the Covid-19 pandemic that the country has been facing since March.

As a preventive measure of liquidity risk management for the Covid-19, the Bank has implemented daily reports that allow monitoring of the main operational and structural indicators as well as an alignment of liquidity management with credit and market risk.

Projections have also been made of the magnitude of the impacts that the Covid-19 crisis could generate in the Bank's financial indicators, which are updated based on the development of the emergency situation, for decision-making

The Bank’s assets and liabilities mature as follows:

As of June 30, 2020

Assets		Demand	1 to 30 days	31 to 60 days	61 to 90 days	91 to 180 days	181 to 365 days	More than 365 days	More tan 30 days past due	Total

(d) Price risk of the portfolio

The Bank administers two investment portfolios: own Funds and Development Credit Funds.

In the case of own funds, a concentration of 44.91% is observed in instruments issued by the Ministry of Finance. In this sense and with the purpose of mitigating the market risk of these instruments, a strategy was defined in the investment position of this issuer.

The results of the VaR SUGEF 03-06 methodology are detailed below, considering both portfolios:

		June 2020
VaR	¢	4.933.245.844
Investment portfolio	¢	14.799.737.533
Risk Price		1.470.997
Observation 25		(0.0064787210)
Exchange rate UDES	¢	915.1950
Exchange rate USD	¢	583.4900
Nominal value investment portfolio	¢	755.093.095.815
Market value investment portfolio	¢	761.453.656.801

As part of the mitigation actions to contain the price risk, the Bank validates having investment concentrations subject to price assessment not greater than 6%. At the closing of June 2020, the limit was exceeded in three positions.

(e) Interest rate risk

The Bank has a credit portfolio, investments, and obligations with the public and with entities subject to variable interest rates and therefore sensitive to fluctuations in interest rates and cash flow risk. As of June 30, 2020, a sensitivity analysis on possible variations in interest rates has been developed.

Sensitivity to an increase in the interest rate of investments

		June 2020
Investment in financial instruments	¢	960.440.934.038
Increase in rates by 1%		224.033.445
Increase in rates by 2%	¢	448.066.890

Sensitivity to a decrease in the interest rate of investments

		June 2020
Investment in financial instruments	¢	960.440.934.038
Decrease in rates by 1%		224.033.445
Decrease in rates by 2%	¢	448.066.890

(*) Rate-sensitive

Within the gap report (rate-sensitive assets and liabilities) in local currency, a total difference of asset recovery less maturity of liabilities as of June 30, 2020, for ¢1.596.059.358.217 while in foreign currency the same difference is of ¢1.010.427.670.380 is shown, being an improved inference in the balance sheet due to positive changes in interest rates, since the entity presents more assets than liabilities in both currencies. Regarding to term matching (sum of liquidity of assets and liabilities) as of June 2020, the total amount in local currency was of ¢325.673.700.057 while in foreign currency, the collected data for the compliance of obligations was of ¢112.278.704.873 however, on a consolidated basis it shows the necessary solvency to meet the liquid liabilities of the Organization.

(f) Foreign exchange risk

The Bank incurs in transactions denominated in US dollars and minority of Euros. This currency experiences periodic fluctuations with respect to the Costa Rican colon, in accordance with the monetary and exchange policies of the Central Bank of Costa Rica (BCCR). Therefore, any fluctuation in the value of the US Dollar affects the results, financial position and cash flows of the Entity, which constantly monitors its net foreign currency exposure in order to minimize this risk.

The Bank uses two indicators to manage the foreign exchange risk: matching assets and liabilities denominated in foreign currency and the sensitivity of the foreign currency position.

During the second quarter of 2020 the exchange rate has had a stable behavior, resulting in a volatility of 0.62%.

To comply with the Own Position in Foreign Currency, the Treasury Management had to maintain a positive position in foreign currency, reaching US$225.5 million.

Monetary assets and liabilities denominated in U.S. dollars are as follows:

		June 2020
Assets:		
Cash and due from banks	US$	498.310.550
Investments in financial instruments		625.053.203
Loan portfolio		1.497.840.645
Accounts and accrued interest receivable		1.031.175
Investments in other companies		122.066.600
Other		21.940.920
Total assets		**2.766.243.093**
Liabilities:		
Obligations with the public		2.015.711.340
Other financial obligations		476.235.402
Other account payable and provisions		36.110.509
Other liabilities		18.681.314
Total liabilities		**2.546.738.565**
Net position (excess of monetary assets over monetary liabilities)	US$	**219.504.528**

Monetary assets and liabilities in foreign currency are valued by using the reference sale rate established by BCCR on the last business day of each month. As of June 30, 2020, that rate was ¢583.49 for US $1,00.

Net exposure is not hedged. However, the Bank considers its position to be acceptable since it can buy or sell U.S. dollars in the market when necessary.

The following table shows the possible annual gains (losses) if there are variations of 5 percentage points in the exchange rates, respectively.

Sensitivity to an increase in the exchange rate

	June 2020
Net position	219.504.528
Closing exchange rate	583.49
Increase in the exchange rate by 5%	29.17
Profit	6.402.947.082

Sensitivity to a decrease in the exchange rate

	June 2020
Net position	219.504.528
Closing exchange rate	583.49
Decrease in the exchange rate by 5%	(29.17)
Loss	(6.405.947.082)

Monetary assets and liabilities in Euros are detailed as follows:

		June 2020
Assets:		
Cash and due from banks	EUR€	4.476.711
Other assets		1.403
Total assets		4.478.114
Liabilities:		
Obligations with the public		4.524.770
Other financial obligations		511.414
Other accounts payable and provisions		55.307
Other liabilities		64
Total liabilities		5.091.555
Net position (excess of monetary assets over monetary liabilities)	EUR€	**(613.441)**

BANCO DE COSTA RICA

The Bank incurs in currency risk when the value of its dollar-denominated assets and liabilities is affected by exchange rate variations, which is recognized in the separate income statement.

For the period ended June 30, 2020, the separate accumulated financial statements show a net foreign exchange profit of ¢1.290.737.671.

(g) Operational risk management

Operational risk is defined as the possibility of loss resulting from inadequate use or unforeseen failure of processes, personnel, and internal and even automated systems or due to external events. This definition includes technological and legal risks but excludes the strategic and reputational risk.

The objective of the operational risk management is to minimize the financial losses of the Conglomerate, as well as achieving efficiency and effectiveness in the execution of processes and optimize its Internal Control System, for which an annual plan is established that incorporates the risk assessments to be carried out, and which is updated according to the internal and external environment, such as the Pandemic, which led to adjustments.

The model of management and control of operational risk establishes an evaluation process which comprises stages of identification, analysis and assessment, also, the control, mitigation, tracing and information is performed. Considering the above a set of qualitative and quantitative techniques and tools are developed that allow determining the risk level in the substantive processes; this from the estimate of the probability of occurrence of identified relevant events and their impact. Currently, events originated by external events as well as those caused by failures in processes, systems and persons are identified.

Regarding the calculation of regulatory capital, the BCR uses the basic method; however, it has been proposed to soon start the project to evolve to the standard method proposed by the Basel Committee. However, the priority in the operational risk management continues to focus on prevention and mitigation in the relevant processes.

Moreover, tracing of the risk indicators resulting in mitigating actions that prevent from materializing the events and mitigation plans for those events that present deviations from the admissibility parameters.

Given the nature of the entity and the risks inherent to its activities, the risk of internal and external fraud is considered as relevant, for which periodic training programs are implemented on elements that collaborate in the early detection of cases, as well as prevention announcements that warn of the different types of fraud and their evolution in our environment. Likewise, there are plans that will be activated in case of non-compliance of the parameters established.

Through the automated OpRisk tool, the operational risks detected in the risk evaluations are managed with their respective treatment plans. Additionally, the tool is fed with the materialized event reports recorded by the Bank's different offices, for which it has a consolidated database, complying with the provisions of the SUGEF Agreement 18-16. Reglamento sobre la gestión del riesgo operative.

Regarding the IT risk management, has an annual risk evaluation plan as established by SUGEF 14-17 “Regulation on the management of information technology”, critical applications, IT outsourcing service contracts, strategic projects, new products, and requests for products on demand. These exercises identify and analyze the main risk events that might affect the smooth operation of the technological platform to develop risk treatment plans for mitigation and control. At the end of the first semester, the defined work plan has been 100% fulfilled.

In addition, as part of the IT risk management, indicators of the most relevant technological risks of the BCR Financial Conglomerate are considered and followed up on. For each of them there are corrective actions or a mitigation plan that is activated in the event of non-compliance with the tolerance or the established limit; they are regularly reviewed and updated in conjunction with risk takers, as part of the continuous improvement of the management process.

As part of the efforts carried out, the change management and vulnerability analysis indicators have been substantially improved, and work is currently underway to identify possible new indicators.

The reports with the results are periodically presented to the corresponding corporate governance bodies, as part of the Management Information System.

Business Continuity

Regarding business continuity, as requested by the agreement SUGEF 18-16 “Regulation on the Management of Operational Risk”, in article 12, Business Continuity, subsection E) Execution of periodic tests and evaluation of its results; the Bank of Costa Rica has established a Test Plan incluiding a Contingency Plan for the Commercial Offices.

The commercial offices are the physical channel through which the bank offers its products and services to the clients and it is of great importance to have a plan, in case of an interruption of priority services offered by the Bank.

The Contingency Plan of the Commercial Offices contains the customer service protocols and the steps to be developed for the attention of the critical products identified in the Business Impact Analysis (BIA). The common scenario of interruption is mainly based on the non-availability of services, which is the effect on communications between a commercial office and the Bank's data center.

The application of the contingency plan allows the personnel to exercise themselves in the event of a real affectation, in addition to identifying weaknesses, proposing improvements and adjusting the existing procedures.

The Business Continuity Unit is the one that manages the necessary adjustments for the correct functioning of the contingency plan with the commercial and technology areas, based on the identified errors and results obtained from the application of tests, as well as preparing programs for staff training to strengthen the culture in business continuity issues.

It is through tests that the effectiveness of business continuity plans can be measured and evaluated; in addition, the results of these tests allow the organization to acquire the capacity to support, respond and resume the normal operation of its functions within a prudential period of time, so our business is not compromised and thus minimize the negative impacts that an interruption has on the organization.

Finally, regarding the management of risk of legitimization of capital and financing of terrorism and proliferation of weapons of mass destruction, the permanent reinforcement of the culture in the business areas is maintained with respect to the risk-based management scope. This management is aimed at preventing operations of concealment and mobilization of capital of doubtful origin or, aimed at legitimizing capital, financing terrorist activities or the proliferation of weapons of mass destruction through the Bank. This effort integrates normatively defined evaluation factors such as customers, products, services, channels and geographical areas.

Upon request by the private banks for a change as to operate in accordance with provisions contained in subparagraph ii) of Law N.1644, Organic Law of the National Financial System, the Governing Body of Development Banking, authorizes the managing banks to transfer the funds of the Development Credit Fund, whose refund would be done in monthly installments during a maximum period of six months.

As of June 30, 2020, no transfers of resources have been made from the Development Credit Fund.

(37) Transition to the International Financing Reporting Standards (IFRSs)

a) IAS 1: Presentation of Financial Statements

New IAS I is effective as from the periods beginning on or after January 1, 2009.

The presentation of financial statements required by the Board differs in some respects from presentation under IAS 1. Following are some of the most significant differences:

SUGEF Standards do not allow certain transactions, such as clearing house balances, gains or losses on the sale of financial instruments, income taxes, among others, to be presented on a net basis. Given their nature, IFRSs require those balances to be presented net to prevent assets and liabilities or profit or loss from being overstated.

b) IAS 1: Presentation of Financial Statements (revised)

This standard is applicable for periods beginning on or after July 1, 2012. The changes that have been included in IAS 1 are specific paragraphs related to the presentation of other comprehensive income. These changes will require the other comprehensive income to be presented separating those that cannot be reclassified subsequently to the income statement and those that may be reclassified subsequent to the income statement if certain specific conditions are met.

IAS 1 requires an entity to disclose reclassification adjustments and income tax relating to each component of other comprehensive income. Reclassification adjustments are amounts reclassified to profit or loss in the current period that were previously recognized in other comprehensive income.

Revised IAS I changes the name of some financial statements, using “statement of financial position” instead of balance sheet.

IAS I require an entity to present a statement of financial position as at the beginning of the earliest comparative period in a complete set of financial statements when the entity applies an accounting policy retrospectively or makes retrospective restatement.

The financial statements presentation format is determined by the Board and can be different from the options permitted on certain IFRS and IAS.

c) IAS 7: Statements of Cash Flows

The Board has only authorized preparation of the cash flow statement using the indirect method. The direct method is also acceptable under IAS 7.

d) IAS 8: Accounting Policies. Changes in Accounting Estimates. and Errors

In some cases, SUGEF has authorized the reporting of notices of deficiencies received from Tax Authorities against prior period retained earnings.

e) IAS 12: Income tax

A company recognizes all the tax consequences of the payment of dividends in the same way as the income tax.

f) IAS 16: Property, Plant and Equipment

The Standard issued by the Board requires the revaluation of property through appraisals made by independent appraisers at least once every five years, eliminating the option to carry these assets at cost or to revalue other types of assets.

Furthermore, SUGEF permits the conversion (capitalize) of the surplus revaluation directly in equity (only for state banks), without having to relocate previously to retained earnings, as required by IAS 16.

Moreover, under IAS 16, depreciation continues on property, plant and equipment, even if the asset is idle. The Standard issued by the Board allows entities to suspend the depreciation of idle assets and reclassify them as realizable assets.

g) IAS 18: Revenue

The Board has allowed regulated financial entities to recognize loan fees and commissions collected prior to January 1, 2003 as revenue. Additionally, the Board has permitted the deferral of the credit fee formalization of 25%, 50%, and 100% of loan fees and commissions for transactions completed in 2003, 2004, and 2005, respectively. IAS 18 prescribes deferral of 100% of those fees and commissions over the loan term.

The Board has also allowed deferral of the net excess of loan fee income minus expenses incurred for activities such as assessment of the borrower's financial position, evaluation and recognition of guarantees, sureties, or other collateral instruments, negotiation of the terms of the instrument, preparation and processing of documents, and settlement of the operation. IAS 18 does not allow deferral on a net basis of loan fee income. Instead, it prescribes deferral of 100% of loan fee income, and permits the deferral of only certain incremental transaction costs, rather than all direct costs. Accordingly, when costs exceed income, loan fee income is not deferred, since the Board only allows the net excess of income over expenses to be deferred. This treatment does not conform to IAS 18 and IAS 39, which prescribe separate treatment for income and expenses (see comments on IAS 39).

From January 1, 2014 the treatment of loan commissions was implemented as directed in IAS 18.

h) Revised IAS 19: Employee Benefits

This standard is modified to recognize that the discount rate to be used must correspond with bonds in local currency.

The transition date is for periods beginning on or after January 1, 2017 and may be applied in advance, disclosing that fact. Any adjustment for its application must be made against retained earnings at the beginning of the period.

This standard is for application in the periods that begin in or after January, 1, 2013. It includes changes referring to the benefit plans defined for which it previously required that the measurements of the actuarial appraisals were recognized in the income statement or in the other comprehensive income. The new IAS 19 will require the changes in measurements to be included in other comprehensive income and the cost of services and net interest to be included in the income statement.

i) IAS 21: The Effects of Changes in Foreign Exchange Rates

The Board requires that the financial statements of regulated entities to be presented in colones as the functional currency.

j) IAS 23: Borrowing costs

A company treats as part of the general financing any financing originally made to develop an asset when an asset is ready for use or sale.

k) IAS 24: Related Party Disclosures

The International Accounting Standards Board revised IAS 24 in 2009 in order to: (a) simplify the definition of "related parties", clarify the meaning to be given to this term and eliminate the incoherencies of the definition; (b) Provide a partial exemption from the requirement of information disclosed by entities related to the government.

This standard will be applied retroactively for the annual periods starting as from January 1, 2011.

l) IAS 27: Consolidated and Separate Financial Statements

The Board requires that the financial statements of a parent entity to be presented separately,

measuring its investments by the equity method. Under IAS 27, a parent is required to present consolidated financial statements. A parent company needs not to present consolidated financial statements when the ultimate or any intermediate parent of the parent produces consolidated financial statements available for public use, provided certain other requirements are also met. However, in this case. IAS 27 requires that investments be accounted for at cost.

In the case of financial groups, the holding company must consolidate the financial statements of all of the companies of the group in which it holds an ownership interest of twenty-five percent (25%) or more, irrespective of control. For such purposes, proportionate consolidation should not be used, except in the consolidation of investments in joint ventures.

Amended IAS 27 (2008) requires accounting for changes in ownership interests by the Bank in a subsidiary, while maintaining control, to be recognized as an equity transaction. When the Bank loses control of a subsidiary, any interest retained in the former subsidiary will be measured at fair value with the gain or loss recognized in profit or loss. The amendments to IAS 27 became mandatory for the Bank's 2010 consolidated financial statements. These amendments have not been adopted by the Board.

The objective of this standard is to describe accounting treatment and disclosures required by subsidiaries, joint ventures, and associates when the entity presents separate financial statements.

m) IAS 28: Investments in Associates and Joint Ventures

The Board requires consolidation of investments in companies in which an entity holds twenty-five percent (25%) or more equity interest, irrespective of any considerations of control. Such treatment does not conform to IAS 27 and IAS 28.

The objective of this standard is to describe the accounting treatment for Investments in partners and it determines the requirements for the application of the method of equity participation when recording investments in associates and joint ventures.

n) Revised IAS 32: Financial Instruments: Presentation

Revised IAS 32 provides new guidelines clarifying the classification of financial instruments as liabilities or equity (e.g. preferred shares), SUGEVAL determines whether those shares fulfill the requirements of capital stock.

o) Amendments to IAS 32: Financial Instruments - Presentation and IAS 1: Presentation of Financial Statements - Puttable Financial Instruments and Obligations Arising on Liquidation

The amendments to the standards require puttable instruments and instruments that impose on the entity an obligation to deliver to another party a pro rata share of the net assets of the entity only on liquidation to be classified as equity if certain conditions are met. These changes have

not been adopted by the Board.

p) IAS 37: Provisions, Contingent Liabilities and Contingent Assets

SUGEF requires that a provision for possible losses must be booked for contingent assets. IAS 37 does not allow this type of provision.

q) IAS 38: Intangible Assets

The commercial banks listed in article 1 of Internal Regulations National Banking System (Law No. 1644) may present organization and installation expenses as an asset in the balance sheet, however, those expenses must be fully amortized on the straight-line method over a maximum of five years. Similar procedure and term must be used for the amortization of goodwill acquired.

Automatic applications should be amortized systematically by the straight-line method during the term which produces economic benefits; such term could not exceed five years. Similar proceeding applies to obtained goodwill.

IAS 38 allows different methods to distribute an asset amortizable amount during useful life. Useful life of automatic applications could be longer than five years as stated by CONASSIF standards.

On the other hand, IFRS do not require annual goodwill amortization, only yearly assessment for impairment is required.

r) IAS 39: Financial Instruments: Recognition and Measurement

The Board requires that the loan portfolio be classified pursuant to SUGEF Directive 1-05 and that the allowance for loan impairment be determined based on that classification. It also allows excess allowances to be booked. IAS 39 requires that the allowance for loan impairment be determined based on a financial analysis of actual losses. IAS 39 also prohibits the recording of provisions for contingent accounts. Any excess allowances must be reversed in the income statement.

Revised IAS 39 introduced changes with respect to classification of financial instruments, which have not been adopted by the Board. The revised version includes the following changes:

- The option of classifying loans and receivables as available for sale was established.
- Securities quoted in an active market may be classified as available for sale, held-for-trading, or held to maturity.
- The "fair value option" was established to designate any financial instrument to be measured at fair value through profit or loss, provided a series of requirements are met (e.g. the instrument has been measured at fair value since the original acquisition date.)
- The category of loans and receivables was expanded to include purchased loans and receivables that are not quoted in an active market.

The Board has also allowed capitalization of direct costs incurred for assessment of the borrower's financial position, evaluation and recognition of guarantees, sureties, or other collateral instruments, negotiation of the terms of the instrument, and preparation and processing of documents, net of income from loan fees. However, IAS 39 only permits capitalization of incremental transaction costs, which are to be presented as part of the financial instrument and may not be netted against loan fee income (see comments on IAS 18).

Regular purchases and sales of securities are to be recognized using the settlement date accounting only.

The amendment to IAS 39 clarifies the existing principles that determine whether specific risks or portions of cash flows are eligible for designation in a hedging relationship. The amendments to IAS 39 became mandatory for 2010 financial statements, with retrospective application. This amendment has not been adopted by the Board.

s) IAS 40: Investment Property

IAS 40 allows entities to choose between the fair value model and the cost model to measure their investment property. The Standard issued by the Board only allows entities to use the fair value model to measure this type of assets, unless clear evidence for determining the fair value of the assets is unavailable.

t) Revised IFRS 3: Business Combinations

The revised standard (2008) incorporates the following changes:

- The definition of a business has been broadened, which is likely to result in more acquisitions being treated as business combinations.
- Contingent consideration will be measured at fair value, with subsequent changes therein recognized in profit or loss.
- Transaction costs, other than share and debt issue costs, will be expensed as incurred.
- Any pre-existing interest in the acquirer will be measured at fair value, with the related gain or loss recognized in profit or loss.
- Any non-controlling (minority) interest will be measured at either fair value, or at its proportionate interest in the identifiable assets and liabilities of the acquirer, on a transaction-by-transaction basis.

Revised IFRS 3, which became mandatory for 2010 financial statements, will be applied prospectively. This Standard has not been adopted by the Board.

u) IFRS 5: Non-current Assets Held for Sale and Discontinued Operations

The Board requires that an allowance be booked for 100% of the carrying amount of assets that have not been sold within two years. IFRS 5 requires that such assets be recorded and measured at the lower of cost or fair value, discounting the future cash flows of assets to be sold in more than one year. Accordingly, assets could be understated, with excess allowances.

v) Amendments to IFRS 7: Financial Instruments – Disclosures

In March 2009, the IASB issued certain amendments to IFRS 7, Financial Instruments: Disclosure, which requires enhanced disclosures about fair value measurements and liquidity risk in respect of financial instruments.

The amendments require that fair value measurement disclosures use a three-level fair value hierarchy that reflects the significance of the inputs used in measuring fair values of financial instruments. Specific disclosures are required when fair value measurements are categorized as Level 3 (significant unobservable inputs) in the fair value hierarchy. The amendments require that any significant transfers between Level 1 and Level 2 of the fair value hierarchy be disclosed separately, distinguishing between transfers into and out of each level. Furthermore, changes in valuation techniques from one period to another, including the reasons therefor, are required to be disclosed for each class of financial asset.

Furthermore, the definition of liquidity risk has been amended and it is now defined as the risk that an entity will encounter difficulty in meeting obligations associated with financial liabilities that are settled by delivering cash or another financial asset.

The amendments require disclosure of a maturity analysis for non-derivative and derivative financial liabilities, but contractual maturities are required to be disclosed for derivative financial liabilities only when contractual maturities are essential for an understanding of the timing of cash flows. For issued financial guarantee contracts, the amendments require the maximum amount of the guarantee to be disclosed in the earliest period in which the guarantee could be called. These amendments have not been adopted by the Board.

w) IFRS 9: Financial Instruments

IFRS 9 deals with classification and measurement of financial assets. The requirements of this Standard represent a significant change from the existing requirements in IAS 39 in respect of financial assets. The Standard contains two primary measurement categories for financial assets: amortized cost and fair value. The Standard eliminates the existing IAS 39 categories of held to maturity, available for sale, and loans and receivables. For an investment in an equity instrument which is not held for trading, the Standard permits an irrevocable election, at initial recognition, on an individual share-by-share basis, to present all fair value changes in other comprehensive income. No amount recognized in other comprehensive income would ever be reclassified to profit or loss later.

The standard requires that derivatives embedded in contracts with a host contract that is a financial asset within the scope of the standard not to be separated; instead the hybrid financial instrument is assessed in its entirety as to whether it should be measured at amortized cost or fair value.

This standard requires entities to determine whether presenting the effects of changes in the credit risk of a liability designated at fair value through profit or loss would create an accounting mismatch based on facts and circumstances at the date on which the financial liability is initially recognized.

The objective of this IFRS is to establish the principles for the financial information about financial assets so that it will present useful and relevant information for the users of the financial statements facing the evaluation of the amounts, schedule and uncertainty of the future cash flows of the entity. The standard includes three chapters on recognition, impairment of financial assets and heading instruments.

This standard supersedes IFRS 9 (2009), IFRS 9 (2010) and IFRS 9 (2013). However, for annual periods beginning in or before January 1, 2018, and entity may elect to apply previous versions of IFRS 9 if, and only if the corresponding date of the entity initial application is prior to February 1, 2015.

x) IFRS 10: Consolidated Financial Statements

This Standard provides a revised control definition and application guidance. Therefore, this IFRS supersedes IAS 27 (2008) and SIC 12, Consolidation - Special Purpose Entities, and is applicable to all investees.

Early application is permitted. Entities that apply this IFRS earlier must disclose that fact and apply IFRS 11, IFRS 12, IAS 27 (as amended in 2011), and IAS 28 (as amended in 2011) simultaneously.

An entity is not required to make adjustments to the accounting for its involvement with an investee when entities are previously consolidated or unconsolidated in accordance with IAS 27 (2008), SIC 12, and this IFRS, continue to be consolidated or continue not to be consolidated.

When application of this IFRS results in an investor consolidating an investee that is a business not previously consolidated, the investor:

1) must determine the date when the investor obtained control of that investee on the basis of the requirements of this IFRS; and

2) will assess the assets, liabilities, and no-controlling interests as if acquisition accounting had been applied from that date.

If (2) is impracticable, then the deemed acquisition date must be the beginning of the earliest period for which retroactive application is practicable, which may be the current period.

The standard is effective for annual periods beginning on or after January 1, 2013. Earlier application is permitted. This standard has not been adopted by the Board.

y) <u>IFRS 11: Joint Arrangements</u>

This standard was issued in May 2011 with an effective date of January 1, 2013. The Standard addresses the inconsistencies in the accounting for joint arrangements and requires a single accounting treatment for interests in jointly controlled entities. This standard has not been adopted by the Board.

The objective of this IFRS is to establish principles for joint arrangements disclosures.

It supersedes IAS 31, Interest in Joint Ventures and SIC 13, Jointly Controlled Entities, nonmonetary contributions by ventures.

z) IFRS 12: Disclosure of Interests in Other Entities

This Standard was issued in May 2011 with an effective date of January 1, 2013. This Standard requires an entity to disclose information that enables users of financial statements to evaluate the nature and financial effects of its investments in other entities, including joint arrangements, associates, structured entities, and "off balance" activities. This Standard has not been adopted by the Board.

aa) IFRS 13: Fair Value Measurement

This Standard was issued in May 2011 and clarifies the definition of fair value, establishes a single procedure for measuring fair value, and defines the measurements and applications required or permitted by IFRSs. This Standard is to be applied for annual periods beginning on or after January 1, 2013. Earlier application is permitted. This Standard has not been adopted by CONASSIF.

This standard is applicable for periods beginning on or after January 1, 2013. This IFRS defines "fair value", establishes a single conceptual framework in IFRS to measure fair value and requires disclosures about the measurement of fair value. This IFRS applies to other IFRSs that allow measurement at fair value.

bb) IFRS 15: Revenue from Contracts with Customers

International Financial Reporting standard IFRS 15, Revenue derived from contracts and clients established principles for presentation of useful information to users of the financial statements about the nature, amount, schedule and uncertainty of revenue and cash flows arising from an entity's contracts with their customers.

IFRS 15 applies to annual periods that begin in or after January 1, 2018. Earlier application is permitted.

IFRS 15 supersedes:

a. IAS 11: Construction Contracts;
b. IAS 18: Revenue;
c. IFRIC 13: Customer loyalty programs;
d. IFRIC 15: Agreements for the construction of real estate;
e. IFRIC 18: Transfer of assets from customers; and
f. SIC-31 Revenue —Barter transactions involving advertising services.

Revenue is important information for users of financial statements, assessing the situation and financial performance of an entity. However, the above requirements for the recognition of revenue on International Financial Reporting Standards (IFRS) differ from accounting principles generally accepted in the United States of America (US GAAP) and both requirements sets needed improvement. The requirements for recognition of revenue from previous IFRS provided limited guidance and, therefore, the two main standards for the recognition of revenue, IAS 18 and IAS 11, could be difficult to apply to complex transactions. Furthermore, IAS 18 provided limited guidance on many important issues of revenue, such as accounting of agreements with multiple elements. Instead, US GAAP comprised broader aspects in the recognition of revenue, along with numerous requirements for industries or specific transactions, which resulted in a different accounting of similar transactions.

Therefore, the International Accounting Standards Board (IASB) and the issuer of national standards in the United States, the Financial Accounting Standards Board (FASB), initiated a joint project to clarify the principles for recognition of revenue and to develop a common standard for revenue to IFRS and US GAAP that:

a. Eliminates inconsistencies and weaknesses of the above requirements on revenue;
b. Provides a solid framework to address the problems of revenue;
c. Improves comparability of recognition practices of revenue between entities, industries, jurisdictions and capital market;
d. Provides more useful information to users of the financial statements through disclosure requirements improved; and
e. Simplify the preparation of the financial statements, reducing the number of requirements that and entity must refer.

The basic principle of IFRS 15 is that an entity recognizes revenue to represent transfer of goods or services committed to customers in exchange for an amount that reflects the consideration to which the entity expects to be entitled to exchange of such goods or services. An entity recognizes revenue in accordance with the basic principle by applying the following steps:

a. Step 1: Identify the contract (contracts) with the client - a contract is an agreement between two or more parties that creates enforceable rights and obligations. The requirements of IFRS 15 apply to each contract which has been agreed with a client and meets the specified criteria. In some cases, IFRS 15, requires an entity to combine contracts and accounted for as one. IFRS 15 also provides requirements for the posting contracts changes.

b. Step 2: Identify performance obligations in the contract - a contract includes commitments to transfer goods or services to a customer. If goods or services are different, commitments and performance obligation are accounted for separately. A good or service different if the client can take advantage of the good or service itself or with other resource that are available to the customer and commitment of the institution to transfer the good or service to the customer is separately recognizable from other contract commitments.

c. Step 3: To determine the transaction Price - the Price of transaction is the amount of consideration in a contract to which an entity expects to be entitled in exchange for the transfer of goods or services involved with the client. The transaction price can be a fixed amount of the consideration for the client but may sometimes include a variable compensation in cash or other form. The transaction price is also adjusted by the value of money over time if the contract includes a significant financing component, as well as any consideration payable to the customer. If the consideration is variable, an entity shall estimate the amount of the consideration to which it shall be entitled to the exchange for goods or services involved. The estimated variable compensation amount is included in the price of transaction only to the extended that is highly likely that a significant reversal of the amount of income recognized accumulated to not occur when the uncertainty associated with the variable compensation was subsequently resolved.

d. Step 4: Allocate the transaction price between performance obligations of the contract -an entity usually allocates the transaction price to each performance obligation based on the relative independent selling prices of each good or service involved in the contract. If a selling price is not observable independently, an entity shall estimate. Sometimes, the transaction price includes a discount or a variable amount of the consideration that relates entirely to a part of the contact. The requirements specify when an entity assigns the discount or variable consideration to one or more, but not all the performance obligations (different goods or services) of the contract.

e. Step 5: Recognize revenue when (or as) the entity satisfies a performance obligation -an entity recognizes the revenue when (or as) it satisfies a performance obligation by transferring goods or services committed to the client (which is when the customer obtains control of that good or service). The amount of income recognized is the amount allocated to the performance obligation satisfied. A performance obligation can be met at any given time (usually for commitments to serve the customer). For performance obligations that are satisfied overtime, an entity recognizes revenue over time by selecting an appropriate method to measure the progress of the entity toward complete satisfaction of that performance obligation.

cc) FRIC 10: Interim Financial Reporting and Impairment

This statement prohibits the reversal of an impairment loss recognized in a previous interim period, regarding to surplus value, investment in an equity instrument or a financial asset booked at cost, IFRIC 10 applies to surplus value, investment in equity instruments and financial assets booked at cost starting from the date the first time the criteria of measurement of NIC 36 and NIC 39 was applied (i.e. January 1, 2004). The Board allows reversal of estimates.

dd) IFRIC 12: Services Concession Arrangements

This interpretation provides guidelines for the posting of public service concession arrangements to a private operator. This interpretation applies both to:

- The infrastructure that the operator builds or purchases from a third party. to be used for the provision of services agreements; and

- Existing infrastructure to which the operator has access in order to provide the services established in the agreement.

IFRIC 12 is mandatory for financial statements as of July 1. 2009. This IFRIC has not been adopted by the Board.

ee) IFRIC 13: Customer Loyalty Programs

This interpretation provides guidance to the entity that grants credits -awards to its customers for loyalty as part of sales transaction which, subject to compliance with any additional condition established as a requirement, the customer can redeem in the future in form of goods, free services or discounts. IFRIC 13 is mandatory for financial statements starting from January 1, 2011. This IFRIC has not been adopted by the Board.

ff) IFRIC 14, IAS 19: Limit on Defined Benefit Asset, Minimum Finding Requirement and their Interaction

This interpretation applies to benefits defined for former employees and other long term benefits for employees. It also considers requirements to maintain a minimum level of funding to any requirement to fund a benefits plan for former employees or other long term benefits plans. It also covers the situation where a minimum level of funding may result in a liability. The IFRIC 14 is mandatory for financial statements starting from January 1, 2011, which retrospective application. This IFRIC has not been adopted by the Board.

gg) IFRIC 16: Hedges of a Net Investment in a Foreign Operation

This interpretation allows an entity using step considerations to choose an accounting policy that covers the risk of exchange rate, in order to determine the accumulative adjustment of currency conversion that is reclassified in results for the disposal of net investments in abroad business, as if the direct method has been used. The IFRIC 16 is mandatory for financial statements as of July, 1, 2009. The Board has not adopted his standard.

hh) IFRIC 17: Distribution of Non-Cash Assets to Owners

This interpretation provides guidance for accounting dividends payable distributed using non- cash assets, at the beginning and the end of the period.

If an entity declares dividends to be distributed through non- cash assets, after the closing of a reported period but before the financial statements are authorized to be issued, it will disclose:

a) The nature of the asset to be distributed.

b) The carrying amount of the asset at the closing date; and

c) If the fair values are determined, wholly or partially, by reference to price quotes published in an active market or are estimated using a valuation method, as well as the method used to determine the fair value and the assumptions applied when using a valuation method.

IFRIC 17 is mandatory for financial statements starting from July 1, 2009. This standard has not been adopted by the Board; its application is prospective; a retrospective application is not permitted.

ii) IFRIC 18: Transfer of Assets from Customers

This interpretation offers guidance for accounting of transfers of property, plant and equipment for entities receiving such transfer from customers, as well as those agreements in which an entity receives cash from customers and must use the cash amount only for construction or purchasing property, plant and equipment. This IFRIC is mandatory for financial statements from July 1, 2009. This IFRIC has not been adopted by the Board.

jj) IFRIC 19: Extinguishing Financial Liabilities with Equity Instruments

This interpretation provides guidance for accounting renegotiated terms of financial liability and give rise to the entity that issues the equity instruments to extinguish the financial liability totally or in part, IFRIC 19 is mandatory for financial statements starting from July 1, 2010. This IFRIC has not been adopted by the Board.

kk) IFRIC 17: Distributions of Non- Cash Assets to Owners

This IFRIC is mandatory for financial statements from July 1, 2009. Its application is prospective; a retrospective application is not permitted.

ll) IFRIC 18: Transfer of Assets from Customers

This interpretation is mandatory for financial statements form July 1, 2009. This interpretation is applicable to entities that transfer assets to other entities for goods or services of different nature, for which an income has to be recognized due to the difference in value.

mm) IFRIC 19: Extinguishing Financial Liabilities with Equity Instruments

IFRIC 19 is mandatory for financial statements starting from July 1, 2010.

nn) IFRIC 21: Levies

This interpretation addresses the accounting of a liability to pay a levy if that liability is within IAS 37. It also addresses the accounting of a liability to pay a levy where the amount and maturity are true.

This interpretation does not address the accounting of cost arising from the recognition of a liability to pay a levy. Entities should apply other standards to decide whether the recognition of a liability to pay a tax results in an asset or an expense.

The event that triggers the obligation and results in a liability to pay a levy is the activity that produces the levy payment, as established by law. For example, if the activity that results in the levy payment is to generate an income from ordinary activities in this period, and the calculation of this tax is based on income from ordinary activities that took place in an earlier period, the event that results in the obligation of the levy is the income generation in the current period. Generating revenue in the previous periods is necessary, but not sufficient to create a present obligation.

An entity does not have an implied obligation to pay a levy to be generated by future period operation; as a result, the entity is economically compelled to continue operating in that future period.

The preparation of financial statements under the going concern assumption does not imply that an entity has a present obligation to pay a levy to be generated by operations in future periods.

The liability to pay a levy is recognized progressively if the event results in the obligation over a period (for example, if the activity that generates the payment of the tax occurs as established by law, over a period). For example, if the event that results in the obligation is the generation of a regular income for activities over a period, the corresponding liability is recognized as the entity produces that income.

An entity shall apply this interpretation for annual periods beginning on or after January 1, 2014.

oo) Amendments to Existing Standards:

Employee Benefits
(Amendment to IAS19)

This standard is modified to recognize the discount rate to be used corresponding with local currency bonds.

The transition date is for annual periods that begin in or after January 1, 2017; it may be applied in advance and disclose that fact. Any application adjustment must be made against retained earnings at the beginning of the period.

This standard is for application in the periods that begin in or after January 1, 2013. It includes changes referring to the benefit plans defined for which it previously required that the re measurement of the actuarial appraisals were recognized in the income statement or in other integral results. The new IAS 19 will require changes in the measurements to be included in other integral results and the cost of services and net interest to be included in the income statement.

Sales or Contribution of Assets between an Investor and its Associate or Joint Venture (Amendments to IFRS 10 and IAS 28)

Loss of Control

When a controlling company loses control of a subsidiary, the controlling company:

a. Will derecognize assets and liabilities of former subsidiary of the consolidated statement of financial position.

b. Recognizes an investment retained in the former subsidiary at fair value and subsequently accounted for this investment and the amount owed by or to the former subsidiary thereof, in accordance with relevant IFRS's. This retained interest at fair value is measured again, as described in paragraph B98 (b) (iii) and B99(a). The value measured again, if applicable, at the date when control is lost, is regarded as the fair value on initial recognition of financial assets, in accordance with IFRS 9 or cost on initial recognition of an investment in an associate or joint venture.

c. Will recognize gain or loss associated with the loss of control of previous controlling company as specified in paragraphs B98 to B99A.

Sale or Contribution of Assets between an Investor and its Associate or Joint Venture (Amendments to IFRS 10 and IAS 28).

Issued in September 2014, it amended paragraphs 25 and 26 and added paragraph B99A. An entity will apply such amendments in a prospective manner to transactions that take places in annual periods starting as of January 1, 2017. An early application is allowed. If an entity applied the amendments earlier, this must be disclosed.

Accounting for Acquisition of Interests in Joint Operations (Amendments to IFRS11)

This IFRS requires the acquirer of an interest in a joint venture whose activity is a business, as defined in IFRS Business Combinations, to apply all the principles on accounting for business combinations of IFRS 3 and other IFRS, except those in conflict with the guidelines of this IFRS. In addition, the acquirer shall disclose the information required by IFRS 3 and other IFRS for business combinations.

Accounting for Acquisition of Interests in Joint Operations (Amendments to IFRS 11), issued in May 2014, amended the heading after paragraph B33 and added paragraphs.

If an entity applies these amendments but doesn't apply IFRS 9, the reference in these amendments to IFRS 9 shall be read as a reference to IAS 39, Financial Instruments: Recognition and Measurement. Amendments to IFRS 11, May, 2014. An entity shall apply those amendments prospectively for annual periods that begin in or after January 1, 2017. Earlier application is permitted. If an entity applies these amendments for a period beginning before, it will disclose that fact.

Equity Method in Separate Financial Statements (Amendments to IAS 27)

Separate financial statements are those presented by a controller (inverter with control on a subsidiary) or an investor with joint control in an investee or significant influence over it. Subject to the requirements of this standard, an entity may choose to account for its investment in subsidiaries, joint ventures and associates at cost, in accordance with IFRS 9, Financial Instruments, or using the equity method as described in IAS 28, Investments in associates and joint ventures.

When an entity prepares separate financial statements, it shall account for investments in subsidiaries, joint ventures, and associates:

a. at cost, or
b. in accordance with IFRS 9; or
c. Using the equity method as described in IAS 28.

An entity shall apply the same accounting for each category of investment. The accounted investments are registered at cost or using the equity method in accordance with IFRS 5, non- current assets held for sale and discontinued operations, in cases where they are classified as held for sale or for distribution (or included in a group of assets for disposal that are classified as held for sale or for distribution). Under these circumstances, the measurement of investments accounted is not amended in accordance with IFRS 9.

The equity method in separate financial statements (Amendments to IAS 27), issued in August, 2014, amended paragraphs 4 to 7, 10, 11 B and 12. An entity shall apply those amendments for annual periods beginning on or after January 1, 2017, retrospectively, in accordance with IAS 8, Accounting Policies, changes in Accounting Estimates and Errors. Earlier application is permitted. If an entity applies these amendments for a period beginning before, it will disclose that fact.

Novation of Derivatives and Continuation of Hedge Accounting (Amendments to IAS 39)

This document established amendments to IAS 39, Financial Instruments: Recognition and Measurement. These amendments result from proposals of the standard project 2013/2: Novation of Derivatives and Continuation of Hedge Accounting, and the corresponding responses received (Proposed Amendments to IAS 39 and IFRS 9) was published in February 2013.

IASB has amended IAS 39 to discontinue exempting the hedge accounting when the novation of a derivative designed as a hedging instrument meets certain conditions. A similar exception will be included in IFRS 9, Financial Instruments.

It is effective from annual periods beginning on or after January 1, 2014.

Disclosure of the recoverable amount of non- financial assets

This document establishes the amendments to IAS 36, Impairment of Assets, The amendments result from proposal of the standard project 2013/1, Disclosure of the recoverable amount of non- financial assets and corresponding response received (Proposed Amendments to IAS 36) that was published in January 2013.

The changes made in this document along the disclose requirements to IAS 36 with the original intention of the IASB. For the same reason, the IASB also amended IAS 36 to require amount of assets that present impairment is based on fair value less cost of disposal, consistent with the disclosure requirements for impairment assets presented in U.S. GAAP.

(38) Figures for 2019

As of June 30, 2020, financial statement figures have not been reclassified for comparison with those of 2019, per modifications to the Chart of Accounts and SUGEF Directive 30-18: “Financial Information Regulations” approved by the National Supervisory Board of the Finance System.

Transitory I of the Regulation requires entities to reestablish comparability in the financial statements; however, for many of the items it is not operationally practicable to establish such comparability; and when comparability is possible, it represents a high cost in its preparation for financial entities, thus being necessary to modify the transitory of the changes in order to exempt entities from such comparability in the presentation of the statements of financial position, of comprehensive income and of changes in equity, both for the intermediate and annual audited information for the 2020 period. The comparability will be reestablished as of the period 2021.

(39) Relevant and subsequent events

As of June 2020, there are relevant and subsequent events to disclose as follows:

Transfer of charges and observations

On November 21, 2014, Provisional Regularization Proposal No. 1-10-017-14-124-031-03 was notified, which informs the Bank of the differences found in tax bases and tax assessments, as well as the Legal facts and basis. The total tax debt is of ¢3.003.887.889 and interest of ¢1.079.849.565 corresponding to fiscal periods 2010-2011-2012 and 2013.

The Bank of Costa Rica expressed partial disagreement with the proposed regularization and awaits notification of the administrative act of liquidation, with concrete expression of the Legal facts and basis that motivate the differences in tax bases and assessments.

On January 14, 2015, according to the last Proposed Regularization, the Tax authorities notified the Bank, in respect of the items presented, together constituting a tax contingency, which from the point of view of legal risk would mean their eventual confirmation of payment obligation or dismissal in the future. For making the corresponding provision, the total of the adjustments confirmed for tax plus interest and proportional penalties to January 8, 2015, date of the liquidation, is the amount of ¢5.116.774.222.

On August 30, 2016, Provisional Regularization Proposal No. 1-10-071-16-085-041-03 was notified, which informs the bank of the differences found in tax bases and tax assessments, as well as the Legal facts and basis. The total tax debt is of ¢9.932.739.485 and interest of ¢2.145.983.333 corresponding to fiscal period 2014.

The Bank expressed partial disagreement with the proposed regulation and is expecting the administrative liquidation to be notified, containing concrete facts and legal principles motivating the differences in the tax bases and tax fees.

On January 2, 2019, the Bank proceeds with the payment of ¢14,138,113,417 to the Ministry of Finance, corresponding to the amounts determined in the audit procedures for the periods from 2010 to 2014, under the tax amnesty, as indicated in Transitory XXIV of the Law on Strengthening of Public Finances No. 9635.

In the month of June, the first advance payment of the Income Tax was due, however the administration of the Bank of Costa Rica decided to avail itself of the benefit offered by the Tax Relief Law No.9830, due to COVID-19, according to the which, as disclosed in article 2 of the Law and article 8 of its Regulations, regarding to discard partial payments to be made in the months of April, May and June 2020 for a single time.

Thus, the Bank's first partial payment was not made, in order to minimize the economic effects of the pandemic in the institution.

The amounts of the payment are presented as follows:

Period		Income tax	Penalties	Total
2010	¢	679.647.526	33.982.376	713.629.902
2011		1.059.187.613	52.959.381	1.112.146.994
2012		987.937.205	98.793.721	1.086.730.926
2013		272.356.511	27.235.651	299.592.162
2014		9.932.739.485	993.273.948	10.926.013.433

Merger by Absorption of Banco Crédito Agrícola de Cartago and Banco de Costa Rica

1. Absorption of Banco Crédito Agrícola de Cartago by Banco de Costa Rica

   As of September 10, 2018, through Law 9605 “Merger by absorption of Banco Crédito Agrícola de Cartago and Baco de Costa Rica”, the merger of Banco Crédito Agrícola de Cartago (Bancrédito) and Banco de Costa Rica (BCR) is decreed, by which the latter will absorb the former and continue its legal being as the prevailing entity.

   The operative merger will be effective within a maximum term of sixty business days after the law comes into force, so that within the aforementioned term Bancrédito must carry out, by means of whoever is exercising its administration, the pertinent administrative or operative tasks to consolidate the merger and absorption process, including the settlement of the remaining personnel of the banking entity.

   Consequently, as a result of this merger, Banco Crédito Agrícola de Cartago will be ceased as a legal entity, and its net assets will be transferred to Banco de Costa Rica, of which it will be a full party as of the effective date of this law.

In the event that at the time of the merger Bancrédito's equity is negative or less than the amount required for Bancrédito to comply with a minimum capital adequacy equal to the BCR's capital adequacy indicator at the effective date of merger, with a minimum limit of ten percent (10%), this difference will be contributed by the Government to Banco de Costa Rica; the amount of the contribution during the 2018 period was of ¢18,907,432,694.

This contribution must be made immediately on the effective date of the merger, which will be made by decreasing the liability that Bancrédito has with the Ministry of Finance for deposits, first charging interest and then the principal of the debt held by Bancrédito with the Ministry of Finance.

The shares of the subsidiaries of the absorbed Bank will be understood as transferred in full right to Banco de Costa Rica, which will assess keeping them in operation, for sale or settlement, all within the maximum and non-extendable period of eighteen subsequent calendar months upon the entry into force of this law, within which period it will be authorized to act as the sole shareholder of such companies.

For all legal purposes, Banco de Costa Rica is authorized to act as the owner of one hundred percent (100%) of the shares of Bancredito's subsidiaries, even though the Bank already owns an Innsurance Broker, so that BCR will determine the future of the company.

Upon expiration of the aforementioned term, the company may not remain in force independently.

2. Integration of the assets of the extinct Banco Crédito Agrícola de Cartago into the equity of Banco de Costa Rica

   The equity of Banco Crédito Agrícola de Cartago (Bancrédito), that is, all of its assets, liabilities, contracts, contingent and debit meoranda accounts, and, in general, all of its rights and obligations, all of the subjective legal situations existing at the effective date of this law and of which it is the holder, will be fully integrated into the legal-equity sphere of Banco de Costa Rica (BCR) and, consequently, will be reflected in the balance sheet from which the merger provided by this law is effective, as provided in Article 1.

The equity of Banco Crédito Agrícola de Cartago will increase the capital stock of Banco de Costa Rica, except in the portion corresponding to the resources of the Financing Development Fund (FOFIDE) managed by the absorbed bank, which will also become part of the equity of Banco de Costa Rica, but added to the equity resource of FOFIDE, so that they are managed by Banco de Costa Rica, pursuant to Law No. 8634, Development Banking System, of April 23 of 2008.

The methodology that will be followed in recording of the merger will be based on carrying values.

Banco de Costa Rica will assume the legal position held by Banco Crédito Agrícola de Cartago with respect to any pre-existing legal relationship.

The National Registry is authorized to, within the term provided in article 1 of this law, proceeds with the change of the owner´s name in favor of Banco de Costa Rica, as well as in the position of creditor held by Banco Crédito Agrícola de Cartago.

If by means of what is indicated in the previous paragraph, Banco de Costa Rica must assume the contractual position of fiduciary with respect to any trust in which it is already a trustee, then the trustor must substitute the fiduciary, for which it is fully authorized, in order to comply with the provisions of article 656 of Law No. 3284, Code of Commerce, of April 30, 1964.

3. About the employees and the directors of Banco Crédito Agrícola de Cartago

The appointments of all the members of the managing bodies of Banco Crédito Agrícola de Cartago (Bancrédito) and its subsidiaries, and of all the management positions of the absorbed Bank and its subsidiaries, which were in force as of this date, shall be settled in full right from the effect date of this law.

The settlement of its personnel will be carried out by Banco Crédito Agrícola de Cartago, through the Interventoría or by someone who is in the exercise of its administration at the time of this law entering into force. The settlement procedure will be carried out in accordance with the legal system applicable to Bancredito's labor relations upon the entry into force of this law, and must be completed within the term established by article 1 of this law.

Any labor contingency that arises after the labor settlement is carried out, according to a final judicial decision, will be processed before and assumed by the Government.

This law does not affect in any way the possible responsibilities, of any nature, that may arise due to the exercise of the position by Bancredito´s staff, including those derived from the actions of the members of the managing bodies of this Bank or its subsidiaries, as well as those who held managing positions, without prejudice to the application of the limitation periods that may correspond.

4. Other liabilities or supervening contingenies

The eventual tax contingencies derived from the income tax that Banco Crédito Agrícola de Cartago (Bancrédito) and its subsidiaries had at the merger date will not be transferred to Banco de Costa Rica (BCR) but will be assumed by the Government.

In the event that subsequent to the merger, other contingent liabilities or contingencies arise according to final judicial resolution, including collection of professional fees of lawyers or experts for judicial proceedings or pending administrative proceedings, or of any other type that were not recorded in the balance sheet of Banco Crédito Agrícola de Cartago or its subsidiaries, must be claimed and processed directly before the Government.

With respect to possible obligations or losses of any kind, which in the future may arise from the different risks inherent to the trusts, due to the fault or negligence of Bancrédito as trustee and which must be assumed with the trustee's equity, be processed before and claimed directly to the Government, in addition to what is required in article 642 of Law No. 3284, Commercial Code, of April 30, 1964.

With respect to compliance with Law No. 8204, “Law on Narcotic Drugs, Psychotropic Substances, Drugs of Unauthorized Use, Related Activities, Money Laundering and Financing of Terrorism”, dated December 26, 2001, in case penalties or sanctions are originated, derived from customers that come from Bancrédito, and that at the time of the merger those risks have not been identified in spite of the due diligence performed by BCR, this Bank is exonerated from all responsibility for the actions by Bancrédito during the five years prior to the effective date of the merger.

5. Settlement of the closed Collective Capitalization Fund

The management and operation of the closed Collective Capitalization Fund of Banco Crédito Agrícola de Cartago (Bancrédito) is transferred to Banco de Costa Rica (BCR). If upon settlement of the Fund there is a positive balance of resources, these will become part of BCR's equity.

In case the Fund loses its sustainability in the future that originates an actuarial deficit for the payment of pensions, such deficit will be assumed by BCR.

6. Transitory dispositions

Transitory I- Related to the indicators mentioned below and included in the Regulation for Judging the Economic-Financial Situation of the Supervised Entities (Agreement SUGEF 24-00), or related to the regulations and indicators that may be issued or substituted in the future, the General Superintendence of Financial Entities (SUGEF) is authorized to exclude within its assessments the effects that on such indicators may be derived from the credit portfolio that Banco de Costa Rica (BCR) has received from Banco Crédito Agrícola de Cartago (Bancrédito), by means of the merger operated by the provisions of this law. The foregoing for a term of three years, counted from the monthly closing date near to the day on which the merger provided for in this law is effective. The indicators that will be excluded are the following:

a) Portfolio with delinquency greater than ninety days on the direct portfolio.
b) Expected los son loan portfolio over the total portfolio.

In addition, that same exception will also apply to any other regulatory indicator, of any kind, that may be adversely affected during that three-year period, as a result of the merger.

Transitory II- Banco Crédito Agrícola de Cartago (Bancrédito) will transfer, within the term established in Article 1 of this law, the active portfolio that is impaired in the risk categories D and E, settled accounts – insolvent -, whose effects should be reduced from the value of Bancrédito's equity that will be delivered to Banco de Costa Rica (BCR), in order to apply the scope of article 1 of this law.

As a result of this transfer, the portfolio indicating arrears greater than 90 days over the direct portfolio must be collected; the indicator must represent a result equal to or lower than that presented at the effective date of merger by BCR, with a maximum limit of three percent (3%), so that the results o BCR will not deteriorate.

Once the Portfolio in categories D and E is transferred, if this indicator in Bancrédito is greater than the one presented by BCR, the additional amount of the impaired portfolio (from higher to lower impairment) must be transferred to liquidated - insolvent accounts with delinquency greater than ninety days, so that the indicator is at least equal to that of BCR, whose effects must be reduced from the value of Brancrédito's equity that will be delivered to Banco de Costa Rica, in order to apply the scope of Article 1 of this Law.

Payment Agreement of Merger by Absorption of Banco Crédito Agrícola de Cartago and Banco de Costa Rica

The Bank and the Ministry of Finance signed an agreement that will allow compliance with Law 9605 "Merger by Absorption of Banco Crédito Agrícola de Cartago and the Bank of Costa Rica", where the latter will pay the Costa Rican Governement the amount of US$50.000.000 and ¢100.000.000.000, plus accrued interest as of the subscription date, amounting to US$1.104.639 and ¢5.928.991.551. To cancel these amounts, on November 20, the Bank transferred in advance the amount of US$50.000.000 and interest accrued on the debt.

In addition, the Bank will issue four term deposit certificates in favor of the Ministry of Finance; the first in the amount of ¢30.052.510.000 due on March 29, 2019. In addition, three certificates of term deposits will be issued in favor of the Ministry of Finance, the first two for ¢23.000.000.000 for a one and two year term, respectively, and the last one for ¢24.000.000.000 with a maturity of three years, for a total of ¢70.000.000.000. These three certificates with an issuance date of December 10, 2018.

The structuring of these certificates was carried out in accordance with the provisions of Law No. 9605 of September 12, 2018.

Dissolution of Bancrédito Sociedad Agencia de Seguros S.A.

On December 17, 2018, in Extraordinary General Shareholders' Meeting No. 29-18, the General Board of Banco de Costa Rica, by law, agrees to dissolve Bancrédito Sociedad de Seguros S.A., in accordance with the article two hundred and one, subsection b) of the Commercial Code and agree to appoint a liquidator to proceed with the distribution of the company's existing assets within the term of the law and according to the inventory made.

Properties investment

The Bank determines that in order to safeguard the institutional permanence and not affect the operation of the Consejo Nacional de Producción, to sign a contract to modify the leasing area, so that the new leasing area contemplates the current one, such as the one that is being used in precarious conditions. Due to the foregoing, as of January 31, 2018, the amounts corresponding to the property and building that were kept in other assets were reclassified to Properties Investments.

Financial Information Regulation

Through articles 6 and 5 of the minutes of the sessions 1442-2018 and 1443-2018, both held on September 11, 2018, the CONASSIF approved the Financial Reporting Regulation, which comes in effect on January 1, 2020.

The Regulation aims to regulate the application of International Financial Reporting Standards (IFRS) and their interpretations (SIC and IFRIC), issued by the International Accounting Standards Board (IASB), considering prudential or regulatory accounting treatments, as well as the definition of a specific treatment or methodology when IFRS proposes two or more application alternatives.

As of June 2020, multiple regulations have been issued with the aim of mitigating the impact of COVID-19 related to the banking and financial sector, as follows:

The CONASSIFF approved:

a. Extend to June 30, 2021 the option to renegotiate the agreed conditions of the credits up to twice in a 24-month period, without these adjustments having negative effects on the debtors' file at the Credit Information Center (CIC).

b. This measure covers loans of more than ¢100 million and those equal to or less than this amount that already have two adjustments in the last 24 months.

c. Loans of 100 million colones or less that to date have had two readjustments within the last 24 months, may readapt their operation once more during the period ending June 30, 2021, without qualifying as a special operation, and

d. This measure allows a third payment readjustment to clients who have already had two arrangements; that the renegotiations be for any operation regardless of the balance and suspend, for one year, the countercyclical provisions (an amount of the profits that should be kept month by month), to all financial entities.

e. The National Council for the Supervision of the Financial System approved on Monday, March 23, new mitigation measures against the negative effects of the coronavirus on the economy of Costa Rica. These measures are complementary to those already taken previously and have the objective of granting access to credit measures to the affected debtors.

f. Measures regarding the Payment Capacity: It was agreed to maintain the level of payment capacity that the companies or individuals had prior to the effects of COVID-19. This measure aims to facilitate the readjustments and / or refinancing of the credits. The aforementioned measure is temporary until March 31, 2021.

g. Measures with respect to Credit Policies and Procedures: A measure that will facilitate the procedures for both the granting of new credits and the readjustments and / or refinancing thereof, where financial entities may omit, in their credit policies and procedures, the information that they ask on a daily baisis to their clients to verify their payment ability. The aforementioned provision will be in force until March 31, 2021.

h. Measures regarding the Suspension of Classification of Irregularities - Sanitation Plan: It was agreed to suspend, for one year, the provision that classifies a financial entity as “type 2 irregularity”, when the institution presents losses for six months or more, in the last 12 months. When a financial institution presents losses for six months or more, in the last 12 months, SUGEF immediately orders the implementation of a sanitation plan to counter the aforementioned situation. It is important to note that SUGEF must amend the parameters for determining liquidity indicators. This measure will be in force for 12-months period.

i. Measures regarding the granting of periods of grace: In accordance with Directive 075-H issued by the Government, it was agreed to allow financial entities to establish grace periods for clients, without the payment of interest or principal. It is important to highlight that this measure will be implemented under the criteria of each financial entity, the term of the grace periods will be determined by each financial entity.

j. Measures regarding the de-accumulation of countercyclical provisions: It was agreed to allow financial entities to establish processes of de-accumulation of counter-cyclical provisions and classify them as income. These estimates correspond to the money that financial institutions reserve to protect themselves from economic cycle risks and / or the effects of portfolio defaults.

General Superintendence of Financial Entities:

a. By Resolution SGF-0971-2 dated March 20, 2020, SUGEF agreed to reduce the “M” factor in the countercyclical allowance formula with the aim of adding opportunity and effectiveness to the dynamics of the countercyclical allowance model.

b. It was agreed to establish in 0,00% the value of the “M” factor referred to in Article 6 of the SUGEF 19-16 Agreement.

c. This minimum required percentage level of countercyclical allowance (“M”) will apply from the monthly close of March 2020 and will be subject to revision during the year 2020.

d. The measure will allow financial entities to allocate resources to grant credits, which would ordinarily be foreseen for the reserves required by law.

Central Bank of Costa Rica

The Board of Directors of the Central Bank of Costa Rica approved the following reforms:

a. It reduced the Monetary Policy Rate (TPM) by 100 basis points, to locate it at 1.25% annually, as of March 17, 2020.

b. In addition, it agreed to reduce the gross interest rate on overnight deposits (DON) to 0.01% per year as of March 17, 2020, and those of the Permanent Credit Facility and the Permanent Market Deposit Facility Integrated Liquidity at 2.00% and 0.01%, respectively; and

c. Modify the control of the Minimum Legal Reserve from 97.5% to a minimum of 90%: “during each and every day of the reserve control period, the balance at the end of the day of deposits in the Central Bank must not be less than 90% of the minimum legal reserve requiryng two previous natural fortnights “. This measure aims to free up a little daily liquidity in the country's commercial banks; however, it is important to note that the required percentages of the Minimum Legal Reserve have not changed (15% in US dollars and 12% in colones).

d. With the aim of positively impacting the liquidity markets, as of March 24, the Central Bank will participate in the liquidity markets of the National Stock Market (overnight market and repurchase market) as an investor in US dollars. In addition, it will participate as an investor in colones in the markets with one-day and up to thirty-days terms.

e. The Central Bank has informed its intention of participating in the Integrated Liquidity Market (the banks' liquidity market) during the next days, with investor positions in a one-day term.

f. Through resolution JD-5922/09, the Board of Directors of the Central Bank agreed to modify the Regulations for credit operations of last instance in national currency of the Central Bank of Costa Rica, related to the reforms necessary for credit applications to be approved through a technological platform.

g. The decisions are based on the analysis of the expected trajectory for inflation and its determinants, the risks in that forecast, and the lag with which the monetary policy measures take effect.

h. These monetary policy measures are intended to continue to press down interest rates in the market, and thereby ease the financial situation of companies and households in the country.

Distribution of dividens

As of July 7, 2020, BCR Pensión Operadora de Planes de Pensiones Complementarias S.A., approves the distribution of dividends for ¢1,158,000,000, according to the resolution of the Extraordinary General Shareholders' Meeting session No. 03-2020.

(40) Date of authorization for issuance of the financial statements

The issuance of the separate financial statements was authorized on July 28, 2020 by the General Management of the Bank.

SUGEF can require modifications to the financial statements after the authorization for issuance date.
